

Statement of Additional Information

ROUNDHILL
INVESTMENTS

Roundhill Ultra Short Duration No Dividend Target ETF

(XBOX — Cboe)

MARCH 16, 2026

This Statement of Additional Information (“SAI”) is not a prospectus. It should be read in conjunction with the prospectus dated March 16, 2026, as it may be revised from time to time (the “Prospectus”), for the Roundhill Ultra Short Duration No Dividend Target ETF (the “Fund”), a series of the Roundhill ETF Trust (the “Trust”). Capitalized terms used herein that are not defined have the same meanings as in the Prospectus, unless otherwise noted. A copy of the Prospectus may be obtained without charge by writing to the Fund’s distributor, Foreside Fund Services, LLC, at Three Canal Plaza, Suite 100, Portland, ME 04101, or by calling toll free at (855) 561-5728. You may also obtain a Prospectus by visiting the Fund’s website at www.roundhillinvestments.com/etf/XBOX.

References to the Investment Company Act of 1940, as amended (the “1940 Act”), or other applicable law, will include any rules promulgated thereunder and any guidance, interpretations or modifications by the Securities and Exchange Commission (the “SEC”), SEC staff or other authority with appropriate jurisdiction, including court interpretations, and exemptive, no action or other relief or permission from the SEC, SEC staff or other authority.

GENERAL DESCRIPTION OF THE TRUST AND THE FUND

The Trust was organized as a Delaware statutory trust on May 2, 2023 and is authorized to issue an unlimited number of shares in one or more series. The Trust is an open-end management investment company, registered under the 1940 Act. The Trust currently offers shares in 73 separate series, representing separate portfolios of investments. This SAI relates solely to the Fund, which is non-diversified. The Fund, as a series of the Trust, represents a beneficial interest in a separate portfolio of securities and other assets, with its own objective and policies.

Roundhill Financial Inc. serves as the Fund's investment adviser ("Roundhill" or the "Adviser"). Exchange Traded Concepts, LLC, serves as each Fund's investment sub-adviser ("ETC" or the "Sub-Adviser"). Foreside Fund Services, LLC serves as the Fund's distributor ("Foreside" or the "Distributor").

The Board of Trustees of the Trust (the "Board of Trustees" or the "Trustees") has the right to establish additional series in the future, to determine the preferences, voting powers, rights and privileges thereof and to modify such preferences, voting powers, rights and privileges without shareholder approval. Shares of any series may also be divided into one or more classes at the discretion of the Trustees. The Trust or any series or class thereof may be terminated at any time by the Board of Trustees upon written notice to the shareholders. Subject to the requirements set forth in Section 3816 of the Delaware Statutory Trust Act, a shareholder of the Fund may bring a derivative action on behalf of the Trust only if the shareholder first makes a pre-suit demand upon the Board of Trustees to bring the subject action unless an effort to cause the Board of Trustees to bring such action is excused. A demand on the Board of Trustees shall only be excused if a majority of the Board of Trustees, or a majority of any committee established to consider the merits of such action, has a material personal financial interest in the action at issue. A Trustee shall not be deemed to have a material personal financial interest in an action or otherwise be disqualified from ruling on a shareholder demand by virtue of the fact that such Trustee receives remuneration from his or her service on the Board of Trustees of the Trust or on the boards of one or more investment companies with the same or an affiliated investment adviser or underwriter.

The Fund's shares ("Fund Shares") list and principally trade on Cboe BZX Exchange, Inc. (the "Exchange"). Fund Shares trade on the Exchange at market prices that may be below, at or above the Fund's net asset value ("NAV"). ETFs, such as the Fund, do not sell or redeem individual Fund Shares. Instead, the Fund offers, issues and redeems Fund Shares at NAV only in aggregations of a specified number of Fund Shares (each a "Creation Unit"). Financial entities known as "authorized participants" (which are discussed in greater detail below) have contractual arrangements with the Fund or the Distributor to purchase and redeem Fund Shares directly with the Fund in Creation Units in exchange for the securities comprising the Fund and/or cash, or some combination thereof. Fund Shares are traded in the secondary market and elsewhere at market prices that may be at, above, or below the Fund's NAV. Fund Shares are only redeemable in Creation Units by authorized participants. An authorized participant that purchases a Creation Unit of Fund Shares deposits with the Fund a "basket" of securities and/or other assets identified by the Fund that day, and then receives the Creation Unit of Fund Shares in return for those assets. The redemption process is the reverse of the purchase process: the authorized participant redeems a Creation Unit of Fund Shares for a basket of securities and other assets. The basket is generally representative of the Fund's portfolio, and together with a cash balancing amount, it is equal to the NAV of the Fund Shares comprising the Creation Unit. Pursuant to Rule 6c-11 of the 1940 Act, the Fund may utilize baskets that are not representative of the Fund's portfolio. Such "custom baskets" are discussed in the section entitled "Creations and Redemptions of Creation Units." Transaction fees and other costs associated with creations or redemptions that include cash may be higher than the transaction fees and other costs associated with in-kind creations or redemptions. In all cases, conditions with respect to creations and redemptions of shares and fees will be limited in accordance with the requirements of SEC rules and regulations applicable to management investment companies offering redeemable securities.

EXCHANGE LISTING AND TRADING

Fund Shares are listed for trading, and trade throughout the day, on the Exchange and in other secondary markets. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of Fund Shares will continue to be met. The Exchange may, but is not required to, remove the Fund Shares from listing if, among other things: (i) following the initial 12-month period beginning upon the commencement of trading of Fund Shares, there are fewer than 50 record and/or beneficial owners of Fund Shares; (ii) the Fund is no longer eligible to operate in reliance on Rule 6c-11 of the 1940 Act; (iii) any of the other listing requirements are not continuously maintained; or (iv) any event shall occur or condition shall exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will also remove Fund Shares from listing and trading upon termination of the Fund.

As in the case of other stocks traded on the Exchange, brokers' commissions on transactions will be based on negotiated commission rates at customary levels.

The Trust reserves the right to adjust the price levels of Fund Shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

INVESTMENT OBJECTIVE AND POLICIES

The Prospectus describes the investment objective and certain policies of the Fund. The following supplements the information contained in the Prospectus concerning the investment objective and policies of the Fund.

The Fund is subject to the following fundamental policies, which may not be changed without approval of the holders of a majority of the outstanding voting securities (as such term is defined in the 1940 Act) of the Fund:

- (1) The Fund may not issue senior securities, except as permitted under the 1940 Act
- (2) The Fund may not borrow money, except as permitted under the 1940 Act.
- (3) The Fund will not underwrite the securities of other issuers except to the extent the Fund may be considered an underwriter under the 1933 Act in connection with the purchase and sale of portfolio securities.
- (4) The Fund will not purchase or sell real estate or interests therein, unless acquired as a result of ownership of securities or other instruments (but this shall not prohibit the Fund from purchasing or selling securities or other instruments backed by real estate or of issuers engaged in real estate activities).
- (5) The Fund may not make loans, except as permitted under the 1940 Act and exemptive orders granted thereunder.
- (6) The Fund may not purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from purchasing or selling options, futures contracts, forward contracts or other derivative instruments, or from investing in securities or other instruments backed by physical commodities).
- (7) The Fund will not concentrate (*i.e.*, invest more than 25% of its total assets) its investments in securities of issuers in any industry or group of industries. For purposes of this limitation, securities

of the U.S. government (including its agencies and instrumentalities), repurchase agreements collateralized by U.S. government securities, and securities of state or municipal governments and their political subdivisions are not considered to be issued by members of any industry.

For purposes of applying restriction (1) above, under the 1940 Act as currently in effect, the Fund is not permitted to issue senior securities, except that the Fund may borrow from any bank if immediately after such borrowing the value of the Fund's total assets is at least 300% of the principal amount of all of the Fund's borrowings (*i.e.*, the principal amount of the borrowings may not exceed 33 1/3% of the Fund's total assets). In the event that such asset coverage shall at any time fall below 300% the Fund shall, within three days thereafter (not including Sundays and holidays), reduce the amount of its borrowings to an extent that the asset coverage of such borrowings shall be at least 300%. The fundamental investment limitations set forth above limit the Fund's ability to engage in certain investment practices and purchase securities or other instruments to the extent permitted by, or consistent with, applicable law. As such, these limitations will change as the statute, rules, regulations or orders (or, if applicable, interpretations) change, and no shareholder vote will be required or sought.

Except for restriction (2), if a percentage restriction is adhered to at the time of investment, a later increase in percentage resulting from a change in market value of the investment or the total assets will not constitute a violation of that restriction. With respect to restriction (2), if the limitations are exceeded as a result of a change in market value then the Fund will reduce the amount of borrowings within three days thereafter to the extent necessary to comply with the limitations (not including Sundays and holidays).

For purposes of applying restriction (5) above, the Fund may not make loans to other persons, except through (i) the purchase of debt securities permissible under the Fund's investment policies, (ii) repurchase agreements, or (iii) the lending of portfolio securities, provided that no such loan of portfolio securities may be made by the Fund if, as a result, the aggregate of such loans would exceed 33-1/3% of the value of the Fund's total assets.

With respect to the fundamental policy relating to concentration set forth in (7) above, the 1940 Act does not define what constitutes "concentration" in an industry. The SEC staff has taken the position that investment of 25% or more of a fund's total assets in one or more issuers conducting their principal activities in the same industry or group of industries constitutes concentration. It is possible that interpretations of concentration could change in the future. The policy in (7) above will be interpreted to refer to concentration as that term may be interpreted from time to time. The policy also will be interpreted to permit investment without limit in the following: securities of the U.S. government and its agencies or instrumentalities; securities of state, territory, possession or municipal governments and their authorities, agencies, instrumentalities or political subdivisions; and repurchase agreements collateralized by any such obligations. Accordingly, issuers of the foregoing securities will not be considered to be members of any industry. There also will be no limit on investment in issuers domiciled in a single jurisdiction or country. Finance companies will be considered to be in the industries of their parents if their activities are primarily related to financing the activities of the parents. Each foreign government will be considered to be a member of a separate industry. With respect to the Fund's industry classifications, the Fund currently utilizes any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. The policy also will be interpreted to give broad authority to the Fund as to how to classify issuers within or among industries.

The foregoing fundamental policies of the Fund may not be changed without the affirmative vote of the majority of the outstanding voting securities of the Fund. The 1940 Act defines a majority vote as the vote of the lesser of (i) 67% or more of the voting securities represented at a meeting at which more than 50% of the outstanding securities are represented; or (ii) more than 50% of the outstanding voting securities. With respect to the submission of a change in an investment policy to the holders of outstanding voting securities of the

Fund, such matter shall be deemed to have been effectively acted upon with respect to the Fund if a majority of the outstanding voting securities of the Fund vote for the approval of such matter, notwithstanding that such matter has not been approved by the holders of a majority of the outstanding voting securities of any other series of the Trust affected by such matter.

In addition to the foregoing fundamental policies, the Fund is also subject to strategies and policies discussed herein which, unless otherwise noted, are non-fundamental policies and may be changed by the Board of Trustees.

INVESTMENT STRATEGIES

The Fund is an actively managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective through multiple combinations of synthetic long and short exchange-listed options positions, each known as a box spread (“Box Spread”) and collectively referred to as box spreads (“Box Spreads”). A Box Spread strategy combines a “synthetic long” position with an offsetting “synthetic short” position, through a grouping of option contracts on an equity security, index or ETF that tracks an index. Option contracts are agreements between a buyer and seller that gives the purchaser of the option the right to buy or sell a particular asset at a specified future date at an agreed upon price, commonly known as the “strike price.” In the case of a “call option,” the purchaser has the right to buy the particular asset and the seller of a “call option” has the obligation to deliver the particular asset at the strike price. In the case of a “put option,” the purchaser has the right to sell the particular asset and the seller of a “put option” has the obligation to purchase the particular asset at the strike price.

For purposes of compliance with this investment policy, derivative contracts will be valued at their notional value. For purposes of compliance with this investment policy, derivative contracts will be valued at their notional value. Fund shareholders are entitled to 60 days’ notice prior to any change in this non-fundamental investment policy.

TYPES OF INVESTMENTS

Options Contracts. The Fund may buy and write (sell) options on diversified securities, such as broad-based indexes and ETFs, for the purpose of realizing its investment objective. Options may settle in cash or settle by a delivery of securities or other assets underlying the options. By buying a call option, the Fund has the right, in return for a premium paid during the term of the option, to buy the asset underlying the option at the exercise price. By writing (selling) a call option the Fund becomes obligated during the term of the option to sell the asset underlying the option at the exercise price if the option is exercised; conversely, by buying a put option, the Fund has the right, in return for a premium paid during the term of the option, to sell the asset underlying the option at the exercise price. By writing a put option, the Fund becomes obligated during the term of the option to purchase the asset underlying the option at the exercise price if the option is exercised. Cash-settled options give the holder (purchaser) of an option the right to receive an amount of cash upon exercise of the option. Receipt of this cash amount will depend upon the value of the underlying asset upon which the option is based being greater than (in the case of a call) or less than (in the case of a put) the level at which the exercise price of the option is set. The amount of cash received, if any, will be the difference between the value of the underlying asset and the exercise price of the option, multiplied by a specified dollar multiple. The writer (seller) of the option is obligated, in return for the premiums received from the purchaser of the option, to make delivery of this amount to the purchaser.

In the case of cleared options, in order to secure the obligation to deliver the underlying asset in the case of a call option, the writer of a call option is required to deposit in escrow the underlying asset or other assets in accordance with the rules of the Options Clearing Corporation (the “OCC”), a clearing agency created to

interpose itself between buyers and sellers of options. The OCC assumes the other side of every purchase and sale transaction on an exchange and, by doing so, guarantees performance by the other side of the transaction. Pursuant to relevant regulatory requirements, the Fund is required to agree in writing to be bound by the rules of the OCC.

If the Fund that writes an option wishes to terminate the Fund's obligation, the Fund may effect a "closing purchase transaction." The Fund accomplishes this by buying an option of the same series as the option previously written by the Fund. The effect of the purchase is that the writer's position will be canceled by the OCC. However, a writer may not effect a closing purchase transaction after the writer has been notified of the exercise of an option. Likewise, the Fund which is the holder of an option may liquidate its position by effecting a "closing sale transaction." The Fund accomplishes this by selling an option of the same series as the option previously purchased by the Fund. There is no guarantee that either a closing purchase or a closing sale transaction can be effected. If any call or put option is not exercised or sold, the option will become worthless on its expiration date. The Fund will realize a gain (or a loss) on a closing purchase transaction with respect to a call or a put option previously written by the Fund if the premium, plus commission costs, paid by the Fund to purchase the call or put option to close the transaction is less (or greater) than the premium, less commission costs, received by the Fund on the sale of the call or the put option. The Fund also will realize a gain if a call or put option which the Fund has written lapses unexercised, because the Fund would retain the premium.

Although certain securities exchanges attempt to provide continuously liquid markets in which holders and writers of options can close out their positions at any time prior to the expiration of the option, no assurance can be given that a market will exist at all times for all outstanding options purchased or sold by the Fund. If an options market were to become unavailable, the Fund would be unable to realize its profits or limit its losses until the Fund could exercise options it holds, and the Fund would remain obligated until options it wrote were exercised or expired. Reasons for the absence of liquid secondary market on an exchange include the following: (i) there may be insufficient trading interest in certain options; (ii) restrictions may be imposed by an exchange on opening or closing transactions or both; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options; (iv) unusual or unforeseen circumstances may interrupt normal operations on an exchange; (v) the facilities of an exchange or the OCC may not at all times be adequate to handle current trading volume; or (vi) one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options) and those options would cease to exist, although outstanding options on that exchange that had been issued by the OCC as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

Securities self-regulatory organizations (*e.g.*, the exchanges and FINRA) have established limitations governing the maximum number of call or put options of certain types that may be bought or written (sold) by a single investor, whether acting alone or in concert with others. These position limits may restrict the number of listed options which the Fund may buy or sell. While the Fund is not directly subject to these rules, as a result of rules applicable to the broker-dealers with whom the Fund transacts in options, it is required to agree in writing to be bound by relevant position limits.

FLexible EXchange options ("FLEX Options"). The Fund may also utilize FLEX Options. FLEX Options are a type of listed options contract with uniquely customizable terms that allow investors to customize key terms like style, strike price and expiration date that are standardized in a typical options contract. FLEX Options are also guaranteed for settlement by the OCC.

Illiquid Investments. Pursuant to Rule 22e-4 under the 1940 Act, the Fund may not acquire any "illiquid investment" if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. An "illiquid investment" is any investment that the Fund

reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. Illiquid investments include repurchase agreements with a notice or demand period of more than seven days, certain stripped mortgage-backed securities, certain municipal leases, certain over-the-counter derivative instruments, securities and other financial instruments that are not readily marketable, and restricted securities unless, based upon a review of the relevant market, trading and investment-specific considerations, those investments are determined not to be illiquid. The Trust has implemented a liquidity risk management program and related procedures to identify illiquid investments pursuant to Rule 22e-4, and the Board of Trustees has approved the designation of the certain officers of the Trust to administer the Trust's liquidity risk management program and related procedures. In determining whether an investment is an illiquid investment, the designated officers of the Trust will take into account actual or estimated daily transaction volume of an investment, group of related investments or asset class and other relevant market, trading, and investment-specific considerations. In addition, in determining the liquidity of an investment, the designated officers of the Trust must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Fund must take this determination into account when classifying the liquidity of that investment or asset class.

In addition to actual or estimated daily transaction volume of an investment, group of related investments or asset class and other relevant market, trading, and investment-specific considerations, the following factors, among others, will generally impact the classification of an investment as an "illiquid investment": (i) any investment that is placed on the Adviser's restricted trading list; and (ii) any investment that is delisted or for which there is a trading halt at the close of the trading day on the primary listing exchange at the time of classification (and in respect of which no active secondary market exists). Investments purchased by the Fund that are liquid at the time of purchase may subsequently become illiquid due to these and other events and circumstances. If one or more investments in the Fund's portfolio become illiquid, the Fund may exceed the 15% limitation in illiquid investments. In the event that changes in the portfolio or other external events cause the Fund to exceed this limit, the Fund must take steps to bring its illiquid investments that are assets to or below 15% of its net assets within a reasonable period of time. This requirement would not force the Fund to liquidate any portfolio instrument where the Fund would suffer a loss on the sale of that instrument.

Short-Term Instruments and Temporary Investments. A Fund may invest in short-term instruments, including money market instruments, on an ongoing basis to provide liquidity, in connection with collateral received by the Fund in its securities lending activities, or for other reasons. Money market instruments are generally short-term investments that may include, but are not limited to: (i) shares of money market funds; (ii) obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities (including government-sponsored enterprises); (iii) negotiable certificates of deposit, bankers' acceptances, fixed-time deposits and other obligations of U.S. and non-U.S. banks (including non-U.S. branches) and similar institutions; (iv) commercial paper rated, at the date of purchase, "Prime-1" by Moody's[®] Investors Service, Inc., "F-1" by Fitch Ratings, Inc., or "A-1" by Standard & Poor's[®] Financial Services LLC, a subsidiary of S&P Global, Inc., or if unrated, of comparable quality as determined by the Adviser and/or Sub-Adviser; (v) non-convertible corporate debt securities (e.g., bonds and debentures) with remaining maturities at the date of purchase of not more than 397 days and that satisfy the rating requirements set forth in Rule 2a-7 under the 1940 Act; (vi) repurchase agreements; and (vii) short-term U.S. dollar denominated obligations of non-U.S. banks (including U.S. branches) that, in the opinion of the Adviser and/or Sub-Adviser, are of comparable quality to obligations of U.S. banks that may be purchased by the Fund. Any of these instruments may be purchased on a current or forward-settled basis. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers' acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

PORTFOLIO TURNOVER

The Fund buys and sells portfolio securities in the normal course of its investment activities. The proportion of the Fund's investment portfolio that is bought and sold during a year is known as the Fund's portfolio turnover rate. A turnover rate of 100% would occur, for example, if the Fund bought and sold securities valued at 100% of its net assets within one year. A high portfolio turnover rate could result in the payment by the Fund of increased brokerage costs, expenses and taxes.

INVESTMENT RISKS

Overview

An investment in the Fund should be made with an understanding of the risks that an investment in Fund Shares entails, including the risk that the financial condition of the issuers of the equity securities or the general condition of the securities market may worsen and the value of the securities and therefore the value of the Fund may decline. The Fund may not be an appropriate investment for those who are unable or unwilling to assume the risks involved generally with such an investment. The past market and earnings performance of any of the securities included in the Fund is not predictive of their future performance.

Borrowing and Leverage Risk

When the Fund borrows money, it must pay interest and other fees, which will reduce the Fund's returns if such costs exceed the returns on the portfolio securities purchased or retained with such borrowings. Any such borrowings are intended to be temporary. However, under certain market conditions, including periods of low demand or decreased liquidity, such borrowings might be outstanding for longer periods of time. As prescribed by the 1940 Act, the Fund will be required to maintain specified asset coverage of at least 300% with respect to any bank borrowing immediately following such borrowing. The Fund may be required to dispose of assets on unfavorable terms if market fluctuations or other factors reduce the Fund's asset coverage to less than the prescribed amount.

Conversion Transaction Risk

The Code limits the availability of capital gains treatment in certain circumstances. If a transaction is marketed or sold as producing capital gains from a straddle position or the transaction is identified as a conversion transaction by the IRS, the Shareholder will not be eligible for capital gains tax treatment. The structure of the Fund's investments has not been identified by the IRS as a conversion transaction. However, the behavior of brokers and dealers distributing the product could affect the character of the gain on disposition. The IRS could at some future point identify the structure of the Fund's investments as a conversion transaction. In such a situation, Shareholders would not be eligible for capital gains tax treatment.

Cybersecurity Risk

The Fund is susceptible to potential operational risks through breaches in cybersecurity. A breach in cybersecurity refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cybersecurity breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cybersecurity breaches of the Fund's third party service providers, such as its administrator, transfer

agent, custodian, or sub-adviser, as applicable, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cybersecurity breaches. The Fund has established risk management systems designed to reduce the risks associated with cybersecurity. However, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cybersecurity systems of issuers or third party service providers.

Derivatives Risk

The use of derivatives presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the derivatives. In addition, when the Fund invests in certain derivative securities, including, but not limited to, when-issued securities, forward commitments, futures contracts and interest rate swaps, the Fund is effectively leveraging its investments, which could result in exaggerated changes in the net asset value of the Fund's shares and can result in losses that exceed the amount originally invested. The success of Sub-Adviser's derivatives strategies will depend on its ability to assess and predict the impact of market or economic developments on the underlying asset, index or rate and the derivative itself, without the benefit of observing the performance of the derivative under all possible market conditions. Liquidity risk exists when a security cannot be purchased or sold at the time desired, or cannot be purchased or sold without adversely affecting the price. Certain specific risks associated with an investment in derivatives may include: market risk, credit risk, correlation risk, liquidity risk, legal risk and systemic or "interconnection" risk, as specified below.

1. *Market Risk.* Market risk is the risk that the value of the underlying assets may go up or down. Adverse movements in the value of an underlying asset can expose the Fund to losses. Derivative instruments may include elements of leverage and, accordingly, fluctuations in the value of the derivative instrument in relation to the underlying asset may be magnified. The successful use of derivative instruments depends upon a variety of factors, particularly the portfolio managers' ability to predict movements of the securities, currencies and commodities markets, which may require different skills than predicting changes in the prices of individual securities. There can be no assurance that any particular strategy adopted will succeed. A decision to engage in a derivative transaction will reflect the portfolio managers' judgment that the derivative transaction will provide value to the Fund and its shareholders and is consistent with the Fund's objective, investment limitations and operating policies. In making such a judgment, the portfolio managers will analyze the benefits and risks of the derivative transactions and weigh them in the context of the Fund's overall investments and investment objective.
2. *Credit Risk/Counterparty Risk.* Credit risk is the risk that a loss may be sustained as a result of the failure of a counterparty to comply with the terms of a derivative instrument. The counterparty risk for exchange-traded derivatives is generally less than for privately negotiated or over-the-counter ("OTC") derivatives, since generally a clearing agency, which is the issuer or counterparty to each exchange-traded instrument, provides a guarantee of performance. For privately negotiated instruments, there is no similar clearing agency guarantee. In all transactions, the Fund will bear the risk that the counterparty will default, and this could result in a loss of the expected benefit of the derivative transactions and possibly other losses to the Fund. A Fund will enter into transactions in derivative instruments only with counterparties that the Adviser reasonably believes are capable of performing under the contract.
3. *Correlation Risk.* Correlation risk is the risk that there might be an imperfect correlation, or even no correlation, between price movements of a derivative instrument and price movements of investments

being hedged. When a derivative transaction is used to completely hedge another position, changes in the market value of the combined position (the derivative instrument plus the position being hedged) result from an imperfect correlation between the price movements of the two instruments. With a perfect hedge, the value of the combined position remains unchanged with any change in the price of the underlying asset. With an imperfect hedge, the value of the derivative instrument and its hedge are not perfectly correlated. For example, if the value of a derivative instrument used in a short hedge (such as writing a call option, buying a put option or selling a futures contract) increased by less than the decline in value of the hedged investments, the hedge would not be perfectly correlated. This might occur due to factors unrelated to the value of the investments being hedged, such as speculative or other pressures on the markets in which these instruments are traded. The effectiveness of hedges using instruments on indices will depend, in part, on the degree of correlation between price movements in the index and the price movements in the investments being hedged.

4. *Liquidity Risk.* Liquidity risk is the risk that a derivative instrument cannot be sold, closed out or replaced quickly at or very close to its fundamental value. Generally, exchange contracts are very liquid because the exchange clearinghouse is the counterparty of every contract. OTC transactions are less liquid than exchange-traded derivatives since they often can only be closed out with the other party to the transaction. A Fund might be required to maintain segregated accounts and/or make margin payments when taking positions in derivative instruments involving obligations to third parties (i.e., instruments other than purchase options). If the Fund is unable to close out its positions in such instruments, it might be required to continue to maintain such assets or accounts or make such payments until the position expires, matures or is closed out. These requirements might impair the Fund's ability to sell a security or make an investment at a time when it would otherwise be favorable to do so, or require that the Fund sell a portfolio security at a disadvantageous time. A Fund's ability to sell or close out a position in an instrument prior to expiration or maturity depends upon the existence of a liquid secondary market or, in the absence of such a market, the ability and willingness of the counterparty to enter into a transaction closing out the position. Due to liquidity risk, there is no assurance that any derivatives position can be sold or closed out at a time and price that is favorable to the Fund.
5. *Legal Risk.* Legal risk is the risk of loss caused by the unenforceability of a party's obligations under the derivative. While a party seeking price certainty agrees to surrender the potential upside in exchange for downside protection, the party taking the risk is looking for a positive payoff. Despite this voluntary assumption of risk, a counterparty that has lost money in a derivative transaction may try to avoid payment by exploiting various legal uncertainties about certain derivative products.

Liquidity Risk

The Fund may have investments that they may not be able to dispose of or close out readily at a favorable time or price (or at all), or at a price approximating the Fund's valuation of the investment. For example, certain investments may be subject to restrictions on resale, may trade over-the-counter or in limited volume, or may not have an active trading market. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. It may be difficult for the Fund to value illiquid securities accurately. The market for certain investments may become illiquid under adverse market or economic conditions independent of any specific adverse changes in the conditions of a particular issuer. If the Fund needed to sell a large block of illiquid securities to meet shareholder redemption request or to raise cash, these sales could further reduce the securities' prices and adversely affect performance of the Fund.

Disposal of illiquid securities may entail registration expenses and other transaction costs that are higher than those for liquid securities.

Options Contracts Risk

The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions and depends on the ability of the Fund's portfolio manager to forecast market movements correctly. The prices of options are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility, which in turn are affected by fiscal and monetary policies and by national and international political and economic events. As a seller (writer) of a put option, the seller will tend to lose money if the value of the reference index or security falls below the strike price. As the seller (writer) of a call option, the seller will tend to lose money if the value of the reference index or security rises above the strike price. As the buyer of a put or call option, the buyer risks losing the entire premium invested in the option if the buyer does not exercise the option. The effective use of options also depends on the Fund's ability to terminate option positions at times deemed desirable to do so. There is no assurance that the Fund will be able to effect closing transactions at any particular time or at an acceptable price. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities and there may at times not be a liquid secondary market for certain options. Options may also involve the use of leverage, which could result in greater price volatility than other markets.

Trading Issues Risk

Although the Fund Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such Fund Shares will develop or be maintained. Trading in Fund Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Fund Shares inadvisable. In addition, trading in Fund Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange's "circuit breaker" rules. Market makers are under no obligation to make a market in the Fund Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. In the event market makers cease making a market in the Fund Shares or authorized participants stop submitting purchase or redemption orders for Creation Units, Fund Shares may trade at a larger premium or discount to their NAV. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small or the Fund does not have enough shareholders.

U.S. Treasury Obligations Risk

U.S. Treasury obligations may differ from other securities in their interest rates, maturities, times of issuance and other characteristics. Similar to other issuers, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund's U.S. Treasury obligations to decline. U.S. Treasury securities are rated AA+ by S&P Global Ratings. A downgrade of the rating of U.S. Treasury securities may cause the value of the Fund's U.S. Treasury obligations to decline. Because U.S. government debt obligations are often used as a benchmark for other borrowing arrangements, a downgrade could also result in higher interest rates for a range of borrowers, cause disruptions in the international bond markets and have a substantial adverse effect on the U.S. and global economy.

A high national debt level may increase market pressures to meet government funding needs, which may drive debt cost higher and lead the government to issue additional debt, thereby increasing refinancing risk. A high national debt also raises concerns that the U.S. government will not be able to make principal or interest payments when they are due. If market participants determine that U.S. sovereign debt levels have become

unsustainable, the value of the U.S. dollar could decline, thus increasing inflationary pressures, particularly with respect to services outsourced to non-U.S. providers and imported goods and constrain or prevent the U.S. government from implementing effective countercyclical fiscal policy in economic downturns. Direct obligations of the U.S. Treasury have historically involved little risk of loss of principal if held to maturity. However, due to fluctuations in interest rates, the market value of such securities may vary during the period that shareholders own shares of the Fund. Notwithstanding that U.S. Treasury obligations are backed by the full faith and credit of the U.S., circumstances could arise that could prevent the timely payment of interest or principal, such as reaching the legislative “debt ceiling.” Such non-payment would result in losses to the Fund and substantial negative consequences for the U.S. economy and the global financial system.

Valuation Risk

The Fund may hold securities or other assets that may be valued on the basis of factors other than market quotations. This may occur because the asset or security does not trade on a centralized exchange, or in times of market turmoil or reduced liquidity. There are multiple methods that can be used to value a portfolio holding when market quotations are not readily available. The value established for any portfolio holding at a point in time might differ from what would be produced using a different methodology or if it had been priced using market quotations. Portfolio holdings that are valued using techniques other than market quotations, including “fair valued” assets or securities, maybe subject to greater fluctuation in their valuations from one day to the next than if market quotations were used. In addition, there is no assurance that the Fund could sell or close out a portfolio position for the value established for it at any time, and it is possible that the Fund would incur a loss because a portfolio position is sold or closed out at a discount to the valuation established by the Fund at that time. The Fund’s ability to value investments may be impacted by technological issues or errors by pricing services or other third-party service providers.

MANAGEMENT OF THE FUND

TRUSTEES AND OFFICERS

The general supervision of the duties performed for the Fund under the Investment Management Agreement (as defined below) is the responsibility of the Board of Trustees. There are four Trustees of the Trust, one of whom is an “interested person” (as the term is defined in the 1940 Act) (the “Interested Trustee”) and three of whom are Trustees who are not officers or employees of Roundhill or any of its affiliates (each an “Independent Trustee” and collectively the “Independent Trustees”). The Trustees serve for indefinite terms until their resignation, death or removal. The Trust has not established a lead Independent Trustee position. The Trustees set broad policies for the Fund, choose the Trust’s officers and hired the Fund’s investment adviser. Each Trustee, except for Timothy Maloney, is an Independent Trustee. Mr. Maloney is deemed an Interested Trustee of the Trust due to his position as Chief Investment Officer and co-owner of Roundhill and Treasurer and Chief Financial Officer of the Trust. The officers of the Trust manage its day-to-day operations, are responsible to the Board of Trustees and serve indefinite terms. The following is a list of the Trustees and executive officers of the Trust and a statement of their present positions and principal occupations during the past five years, the number of portfolios each Trustee oversees and the other directorships they have held during the past five years, if applicable.

- (1) Mr. Maloney is deemed an “interested person” of the Trust due to his position as co-founder and co-owner of Roundhill Financial Inc. and Treasurer and Chief Financial Officer of the Trust.
- (2) Adam Shoffner is an employee of ACA Group, an affiliate of the Fund’s distributor.

UNITARY BOARD LEADERSHIP STRUCTURE

It is anticipated that each Trustee will serve as a trustee of all funds in the Roundhill Fund Complex (as defined below), which is known as a “unitary” board leadership structure. Each Trustee currently serves as a trustee of the Fund and is anticipated to serve as a trustee for future funds issued by the Trust (each, a “Roundhill Fund” and collectively, the “Roundhill Fund Complex”). None of the Trustees who are not “interested persons” of the Trust, nor any of their immediate family members, have ever been a director, officer or employee of, or consultant to, Roundhill or any of its affiliates. Mr. Maloney, an Interested Trustee, serves as the Chairman of the Board of Trustees for each fund in the Roundhill Fund Complex.

The same four persons serve as Trustees on the Board of Trustees and are anticipated to serve on the Board of Trustees of all other funds in the Roundhill Fund Complex. The unitary board structure was adopted for the Roundhill Fund Complex because of the efficiencies it achieves with respect to the governance and oversight of the Roundhill Funds. Each Roundhill Fund is subject to the rules and regulations of the 1940 Act (and other applicable securities laws), which means that many of the Roundhill Funds face similar issues with respect to certain of their fundamental activities, including risk management, portfolio liquidity, portfolio valuation and financial reporting. Because of the similar and often overlapping issues facing the Roundhill Funds, including among any such exchange-traded funds, the Board of Trustees of the Roundhill Funds believes that maintaining a unitary board structure promotes efficiency and consistency in the governance and oversight of all Roundhill Funds and reduces the costs, administrative burdens and possible conflicts that may result from having multiple boards. In adopting a unitary board structure, the Trustees seek to provide effective governance through establishing a board the overall composition of which, as a body, possesses the appropriate skills, diversity, independence and experience to oversee the Fund’s business.

Annually, the Board of Trustees will review its governance structure and the committee structures, its performance and functions and any processes that would enhance board governance over the business of the Roundhill Funds. The Board of Trustees has determined that its leadership structure, including the unitary board and committee structure, is appropriate based on the characteristics of the funds it serves and the characteristics of the Roundhill Fund Complex as a whole.

The Board of Trustees has established two standing committees (as described below) and has delegated certain of its responsibilities to those committees. The Board of Trustees and its committees meet frequently throughout the year to oversee the activities of the Fund, review contractual arrangements with and the performance of service providers, oversee compliance with regulatory requirements and review Fund performance. The Independent Trustees are represented by independent legal counsel at all Board and

committee meetings. Generally, the Board of Trustees acts by majority vote of the Trustees present at a meeting, assuming a quorum is present, unless otherwise required by applicable law.

The two standing committees of the Board of Trustees are the Nominating and Governance Committee and the Audit Committee.

The Nominating and Governance Committee is responsible for nominating non-interested persons to the Board of Trustees. In addition, the Nominating and Governance Committee oversees matters of corporate governance, including the evaluation of Board performance and processes and assignment of committee members, oversees arrangements for orientation of new Board members and continuing education of Independent Trustees, and periodically reviews and makes recommendations about any appropriate changes to Trustee compensation. John Pesce, Felix Rivera and Jeffrey Youngman are members of the Nominating and Governance Committee. If there is no vacancy on the Board of Trustees, the Board of Trustees will not actively seek recommendations from other parties, including shareholders. When a vacancy on the Board of Trustees occurs and nominations are sought to fill such vacancy, the Nominating and Governance Committee may seek nominations from those sources it deems appropriate in its discretion, including shareholders of the Fund. To submit a recommendation for nomination as a candidate for a position on the Board of Trustees, shareholders of the Fund should mail such recommendation to Sean Poyntz, Secretary, at the Trust's address, 154 West 14th Street, 2nd Floor, New York, New York 10011. Such recommendation shall include the following information: (i) a statement in writing setting forth (A) the name, age, date of birth, business address, residence address and nationality of the person or persons to be nominated; (B) the class or series and number of all shares of the Fund owned of record or beneficially by each such person or persons, as reported to such shareholder by such nominee(s); (C) any other information regarding each such person required by paragraphs (a), (d), (e) and (f) of Item 401 of Regulation S-K or paragraph (b) of Item 22 of Rule 14a-101 (Schedule 14A) under the 1934 Act; (D) any other information regarding the person or persons to be nominated that would be required to be disclosed in a proxy statement or other filings required to be made in connection with solicitation of proxies for election of trustees or directors pursuant to Section 14 of the 1934 Act and the rules and regulations promulgated thereunder; and (E) whether such shareholder believes any nominee is or will be an "interested person" of the Fund (as defined in the 1940 Act) and, if not an "interested person," information regarding each nominee that will be sufficient for the Fund to make such determination; and (ii) the written and signed consent of any person to be nominated to be named as a nominee and to serve as a trustee if elected. In addition, the Trustees may require any proposed nominee to furnish such other information as they may reasonably require or deem necessary to determine the eligibility of such proposed nominee to serve as a Trustee.

The Audit Committee is responsible for overseeing the Fund's accounting and financial reporting process, the system of internal controls and audit process and for evaluating and appointing independent auditors (subject also to approval of the Board of Trustees). Messrs. Pesce, Rivera and Youngman serve on the Audit Committee.

RISK OVERSIGHT

As part of the general oversight of the Fund, the Board of Trustees is involved in the risk oversight of the Fund. The Board of Trustees has adopted and periodically reviews policies and procedures designed to address the Fund's risks. Oversight of investment and compliance risk, including, if applicable, oversight of any sub-adviser, is performed primarily at the Board of Trustees level in conjunction with the Trust's Chief Compliance Officer ("CCO") and Anti-Money Laundering Officer.

The Board has appointed a CCO who oversees the implementation and evaluation of the Fund's compliance program. Adam Shoffner of ACA Group serves as CCO and Anti-Money Laundering Officer of the Trust. In

a joint effort between the Trust and ACA Group to ensure the Trust complies with Rule 38a-1 under the 1940 Act, ACA Group has agreed to render services to the Trust by entering into a Chief Compliance Officer Services Agreement (the “CCO Services Agreement”) with the Trust. Pursuant to the CCO Services Agreement, ACA Group designates, subject to the Trust’s approval, one of its own employees to serve as CCO of the Trust within the meaning of Rule 38a-1. Adam Shoffner currently serves in such capacity under the terms of the CCO Services Agreement.

Oversight of other risks also occurs at the committee level. The Adviser’s investment oversight group reports to the Board of Trustees at quarterly meetings regarding, among other things, Fund performance and the various drivers of such performance as well as information related to the Adviser and its operations and processes. The Board of Trustees reviews reports on the Fund’s and the service providers’ compliance policies and procedures at each quarterly Board of Trustee meeting and receives an annual report from the CCO regarding the operations of the Fund’s and the service providers’ compliance programs. In addition, the Independent Trustees meet privately each quarter with the CCO. The Audit Committee reviews with the Adviser the Fund’s major financial risk exposures and the steps the Adviser has taken to monitor and control these exposures, including the Fund’s risk assessment and risk management policies and guidelines. The Audit Committee also, as appropriate, reviews in a general manner the processes other Board committees have in place with respect to risk assessment and risk management. The Nominating and Governance Committee monitors all matters related to the corporate governance of the Trust.

Not all risks that may affect the Fund can be identified nor can controls be developed to eliminate or mitigate their occurrence or effects. It may not be practical or cost effective to eliminate or mitigate certain risks, the processes and controls employed to address certain risks may be limited in their effectiveness, and some risks are simply beyond the reasonable control of the Fund or the Adviser or other service providers. Moreover, it is necessary to bear certain risks (such as investment-related risks) to achieve the Fund’s goals. As a result of the foregoing and other factors, the Fund’s ability to manage risk is subject to substantial limitations.

BOARD DIVERSIFICATION AND TRUSTEE QUALIFICATIONS

As described above, the Nominating and Governance Committee of the Board of Trustees oversees matters related to the nomination of Trustees. The Nominating and Governance Committee seeks to establish an effective Board of Trustees with an appropriate range of skills and diversity, including, as appropriate, differences in background, professional experience, education, vocations, and other individual characteristics and traits in the aggregate. Each Trustee must meet certain basic requirements, including relevant skills and experience, time availability and, if qualifying as an Independent Trustee, independence from the Adviser, underwriters or other service providers, including any affiliates of these entities.

Listed below for each current Trustee are the experiences, qualifications and attributes that led to the conclusion, as of the date of this SAI, that each current Trustee should serve as a Trustee in light of the Trust’s business and structure.

Independent Trustees. John Pesce has served on the Roundhill ETF Trust’s Board of Trustees since 2023. Mr. Pesce has over 30 years of business experience in the financial services industry, including experience relating to institutional and individual financial planning, benefits services, retirement plan design and implementation, portfolio and investment advising, product marketing and financial consulting. He has served as the Chief Executive Officer of TCG Group Holdings LP since 1999 and the Area President of HUB International since 2021.

Felix Rivera is the Chair of the Roundhill Fund Complex Audit Committee and Nominating Committee and has served as a Trustee on the Roundhill ETF Trust’s Board of Trustees since 2023. Mr. Rivera has over 20 years of business experience in the investment management and brokerage business and possesses a strong

understanding of the regulatory framework under which investment companies must operate. He has served as the Managing Partner of Independent Channel Advisors, LLC since 2011.

Jeffrey Youngman has served on the Roundhill ETF Trust’s Board of Trustees since 2023. Mr. Youngman brings significant legal expertise to the Board of Trustees. He has practiced law for over 35 years representing clients in matters relating to serious personal injuries including those concerning children who have suffered injuries as a result of harassment, intimidation and bullying at school. He has served as an attorney at Feitlin, Youngman, Karas & Gerson, L.L.C. since 1988 and is the Managing Member of the firm.

Interested Trustee. Timothy Maloney is the Chairman of the Board of Trustees and Treasurer and Chief Financial Officer of the Roundhill Fund Complex. Mr. Maloney co-founded Roundhill in 2018 and served as its Chief Investment Officer until April 2024. Prior to co-founding Roundhill, Mr. Maloney worked at Wells Capital Management, where he served as a credit trader. Before his time at Wells Capital Management, Mr. Maloney worked for Morgan Stanley, advising hedge fund clients across a spectrum of strategies. He is a CFA Charterholder and a graduate of Vanderbilt University.

Each Independent Trustee is paid a fixed annual retainer of \$250,000. These fees will be allocated equally among each Fund in the Roundhill Fund Complex. Trustees are also reimbursed for travel and out-of-pocket expenses incurred in connection with all meetings.

The following table sets forth the estimated compensation to be earned by each Independent Trustee (including reimbursement for travel and out-of-pocket expenses) for services to the Fund and the estimated aggregate compensation to be paid to them for services to the Roundhill Fund Complex for the fiscal year ended December 31, 2026. The Trust has no retirement or pension plans. The officers and Trustees who are “interested persons” as designated above serve without any compensation from the Trust. The Trust has no employees. Its officers are compensated by Roundhill.

NAME OF TRUSTEE	ESTIMATED COMPENSATION FROM THE FUND	ESTIMATED TOTAL COMPENSATION FROM THE ROUNDHILL FUND COMPLEX
John Pesce	\$3,424	\$250,000
Felix Rivera	\$3,424	\$250,000
Jeffrey Youngman	\$3,424	\$250,000

The following table sets forth the dollar range of equity securities beneficially owned by the Interested and Independent Trustees in the Fund and all funds overseen by the Trustees in the Roundhill Fund Complex as of December 31, 2025:

TRUSTEE	DOLLAR RANGE OF EQUITY SECURITIES IN THE FUND	AGGREGATE DOLLAR RANGE OF EQUITY SECURITIES IN ALL REGISTERED INVESTMENT COMPANIES OVERSEEN BY TRUSTEE IN THE ROUNDHILL FUND COMPLEX
<i>Interested Trustee</i>		
Timothy Maloney	None	Over 100,000
<i>Independent Trustees</i>		
John Pesce	None	None
Felix Rivera	None	Over 100,000
Jeffrey Youngman	None	None

As of December 31, 2025, the Independent Trustees of the Trust and immediate family members did not own beneficially or of record any class of securities of an investment adviser or principal underwriter of the Fund

or any person directly or indirectly controlling, controlled by, or under common control with an investment adviser or principal underwriter of the Fund.

As of the date of this Statement of Additional Information, the officers of the Trust and Trustees, in the aggregate, owned less than 1% of the Fund Shares.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of a fund. A control person is one who owns, either directly or indirectly, more than 25% of the voting securities of a company or acknowledges the existence of control.

CONFLICTS OF INTEREST

Certain activities of the Adviser, its directors, officers, or employees, with respect to the Fund and/or other accounts managed by the Adviser, may give rise to actual or perceived conflicts of interest. In particular, to the extent permitted by applicable law, certain affiliated ETFs advised by the Adviser may invest their assets in the Fund, including those managed by the same portfolio managers, for cash management or other purposes. Such investments could create conflicts of interest related to asset allocation, the timing of purchases, redemptions, or sales, and increased remuneration and profitability for the Adviser and its personnel, including portfolio managers.

INVESTMENT ADVISER AND OTHER SERVICE PROVIDERS

Investment Adviser. Roundhill Financial Inc., 154 West 14th Street, 2nd Floor, New York, New York 10011, serves as the investment adviser to the Fund. Roundhill is a Delaware limited liability company that is controlled by its founding members, William Hershey and Timothy Maloney. William Hershey currently serves as the President of the Trust and Timothy Maloney serves as the Chairman of the Board of Trustees, Treasurer and Chief Financial Officer of the Trust, while also continuing to serve in their roles as Co-Founders of the Adviser. The Adviser is an SEC-registered investment adviser that has provided investment advisory services to pooled investment vehicles since 2019. Roundhill discharges its responsibilities subject to the policies of the Board of Trustees. Roundhill also administers the Trust's business affairs, provides office facilities and equipment and certain clerical, bookkeeping and administrative services, and permits any of its officers or employees to serve without compensation as Trustees or officers of the Trust if elected to such positions.

Pursuant to an investment management agreement between Roundhill and the Trust, on behalf of the Fund (the "Investment Management Agreement"), Roundhill oversees the investment of the Fund's assets by the Sub-Adviser and is responsible for paying all expenses of the Fund, excluding the fee payments under the Investment Management Agreement, interest charges on any borrowings (including net interest expenses incurred in connection with an investment in reverse repurchase agreements or futures contracts), dividends and other expenses on securities sold short, taxes (of any kind or nature, including, but not limited to, income, excise, transfer and withholding taxes), brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments (including any net account or similar fees charged by futures commission merchants) or in connection with creation and redemption transactions (including without limitation any fees, charges, taxes, levies or expenses related to the purchase or sale of an amount of any currency, or the patriation or repatriation of any security or other asset, related to the execution of portfolio transactions or any creation or redemption transactions), acquired fund fees and expenses, accrued deferred tax liability, fees and expenses payable related to the provision of securities lending services, legal

fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith, extraordinary expenses, and distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act. The Fund has agreed to pay Roundhill an annual management fee equal to a percentage of its daily net assets, as detailed in the below table.

Management Fee	
<i>Fund</i>	<i>Fee</i>
Roundhill Ultra Short Duration No Dividend Target ETF	0.1949%

Pursuant to a contractual agreement, the Fund’s investment adviser has agreed to waive its management fee and reimburse certain expenses to prevent the sum of the Fund’s management fee and acquired fund fees and expenses from exceeding 0.1449% until February 18, 2027.

Under the Investment Management Agreement, Roundhill shall not be liable for any loss sustained by reason of the purchase, sale or retention of any security, whether or not such purchase, sale or retention shall have been based upon the investigation and research made by any other individual, firm or corporation, if such recommendation shall have been selected with due care and in good faith, except loss resulting from willful misfeasance, bad faith, or gross negligence on the part of Roundhill in the performance of its obligations and duties, or by reason of its reckless disregard of its obligations and duties. The Investment Management Agreement is in place for the original initial two-year term, and thereafter only if approved annually by the Board of Trustees, including a majority of the Independent Trustees. The Investment Management Agreement terminates automatically upon assignment and is terminable at any time without penalty as to the Fund by the Board of Trustees, including a majority of the Independent Trustees, or by vote of the holders of a majority of the Fund’s outstanding voting securities on 60 days’ written notice to Roundhill, or by Roundhill on 60 days’ written notice to the Fund.

Investment Sub-Adviser. Roundhill has retained Exchanged Traded Concepts, LLC, an Oklahoma limited liability company, located at 10900 Hefner Pointe Drive, Suite 400, Oklahoma City, Oklahoma 73120, to act as sub-adviser to the Funds pursuant to an investment sub-advisory agreement (the “Sub-Advisory Agreement”). The Sub-Adviser is an SEC-registered investment adviser that has provided investment advisory or sub-advisory services to pooled investment vehicles since 2009, including to over 80 1940 Act-registered ETFs as of March 2025. The Sub-Adviser is majority owned by Cottonwood ETF Holdings LLC.

Pursuant to the Sub-Advisory Agreement, Roundhill has agreed to pay for the services provided by the Sub-Adviser through sub-advisory fees. Roundhill is responsible for paying the entire amount of the Sub-Adviser’s fee for the Funds. The Funds do not directly pay the Sub-Adviser.

Portfolio Managers. The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund. There are currently seven portfolio managers, as follows:

- Mr. Maloney co-founded Roundhill in late 2018. He began his career at Morgan Stanley as a Foreign-Exchange and Emerging Markets salesperson. He later joined Wells Capital, where he traded investment grade bonds for a \$35 billion fixed-income portfolio. He graduated from Vanderbilt University with a degree in Economics, and a Masters of Science in Finance (MSF). Mr. Maloney is a CFA Charterholder.
- Mr. Hershey co-founded Roundhill in late 2018. He began his career at Yorkville ETF Advisors, continuing with Yorkville Capital Management after the sale of Yorkville’s ETF business. During his career, he held various roles, including Head Trader for a Yorkville’s long/short energy hedge fund. He graduated from Vanderbilt University with a degree in Economics. Mr. Hershey is a CFA Charterholder.

- Mr. Mazza joined Roundhill in 2023. He began his career at State Street Global Advisors and had various research, portfolio management, and product development responsibilities including leading the strategy and research team for SPDR ETFs. He later worked in leadership roles at OppenheimerFunds and Rafferty Asset Management. He graduated from the Sawyer Business School at Suffolk University with his Masters of Business Administration (MBA) in Finance in 2015 and Boston College with a degree in Political Science and Philosophy in 2005.
- Mr. Serowik joined ETC from Goldman Sachs. He began his career at Spear, Leeds & Kellogg, continuing with Goldman after its acquisition of SLK. During his career of more than 18 years at the combined companies, he held various roles, including managing the global Quant ETF Strats team and One Delta ETF Strats. He designed and developed systems for portfolio risk calculation, algorithmic ETF trading, and execution monitoring, with experience across all asset classes. He graduated from the University of Michigan with a Bachelor of Business Administration degree in Finance.
- Mr. Alberico joined ETC in November 2020, having spent the past 14 years in ETF trading at Goldman Sachs, Cantor Fitzgerald, and, most recently, Virtu Financial. He spent most of that time focused on the Trading and Portfolio Risk Management of ETFs exposed to international and domestic equity. He has worked on several different strategies including lead market-making and electronic trading, to customer facing institutional business developing models for block trading as well as transitional trades. Mr. Alberico graduated from St. John’s University in New York with a Bachelor of Science degree in Finance.
- Mr. Cooper joined ETC in November 2021 and currently serves as a Portfolio Manager. Previously, Mr. Cooper had roles in trade operations for Constellation Advisers from March 2017 until April 2018 and for QFR Capital Management from April 2018 until July 2020 and in the middle office derivatives group of Elliot Capital Management from September 2020 until November 2021. Prior to these roles, he spent 14 years working in various operational roles for Falcon Management Corporation, a global macro family office, gaining exposure to a variety of asset classes with a focus on operations, accounting, and technology. Mr. Cooper graduated from Pennsylvania State University in 2002 with a Bachelor of Science in Finance and a minor in Business Law.

Portfolio Manager Compensation. Messrs. Maloney, Hershey and Mazza are compensated by Roundhill. Each receives a fixed base salary and discretionary bonus that is not tied to the performance of the Fund. The discretionary bonus is based on the overall performance of Roundhill and each individual’s contribution to that performance across all duties. Messrs. Serowik, Alberico, Tan and Cooper are compensated by ETC. Each receives a fixed base salary and discretionary bonus that is not tied to the performance of the Funds.

Portfolio Manager Ownership of Fund Shares. As of the date of this Statement of Additional Information, none of the portfolio managers beneficially owned any Fund Shares.

Other Accounts Managed by the Portfolio Managers. In addition to the Fund, the portfolio managers are responsible for the day-to-day management of certain other accounts, as listed below. None of the accounts managed by the portfolio managers listed below are subject to performance based advisory fees. The information below is provided as of December 31, 2025.

PORTFOLIO MANAGER	REGISTERED INVESTMENT COMPANIES NUMBER OF ACCOUNTS (\$ ASSETS)	OTHER POOLED INVESTMENT VEHICLES NUMBER OF ACCOUNTS (\$ ASSETS)	OTHER ACCOUNTS NUMBER OF ACCOUNTS (\$ ASSETS)
Timothy Maloney	33 (\$8,694,648,047)	0 (\$0)	0 (\$0)
William Hershey	33 (\$8,694,648,047)	0 (\$0)	0 (\$0)

David Mazza	33 (\$8,694,648,047)	0 (\$0)	0 (\$0)
Andrew Serowik	126 (\$21,700,000,000)	0 (\$0)	0 (\$0)
Todd Alberico	126 (\$21,700,000,000)	0 (\$0)	0 (\$0)
Gabriel Tan	126 (\$21,700,000,000)	0 (\$0)	0 (\$0)
Brian Cooper	126 (\$21,700,000,000)	0 (\$0)	0 (\$0)

Conflicts of Interest. The portfolio managers have day-to-day management responsibilities with respect to other investments accounts and, accordingly, may be presented with potential or actual conflicts of interest.

The other accounts may have similar investment objectives or strategies as the Fund. A potential conflict of interest may arise as a result, whereby a portfolio manager could favor one account over another. Another potential conflict could include a portfolio manager’s knowledge about the size, timing, and possible market impact of fund trades, whereby a portfolio manager could use this information to the advantage of other accounts and to the disadvantage of the Fund. However, the Adviser and Sub-Adviser have established policies and procedures to ensure that the purchase and sale of securities among all accounts the Adviser and Sub-Adviser manage are fairly and equitably allocated.

With respect to securities transactions for the Fund, the Sub-Adviser determines which broker to use to execute each transaction, consistent with its duty to seek best execution of the transaction. For buy or sell transactions considered simultaneously for the Fund and other accounts, orders are placed at the same time. The Sub-Adviser uses its best efforts to ensure that no client is treated unfairly in relation to any other client over time in the allocation of securities or the order of the execution of transactions. The Sub-Adviser generally allocates trades on the basis of assets under management so that the securities positions represent equal exposure as a percentage of total assets of each client. The Fund and client accounts are not generally invested in thinly traded or illiquid securities; therefore, conflicts in fulfilling investment opportunities are to some extent minimized. If an aggregated trade order is not substantially filled, it will generally be allocated pro rata.

Transfer Agent and Administrator. U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“USBGFS” or the “Transfer Agent”), located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the Fund’s transfer agent and administrator.

Pursuant to a fund servicing agreement between the Trust and USBGFS, USBGFS provides the Trust with administrative and management services (other than investment advisory services) and accounting services, including portfolio accounting services, tax accounting services, and furnishing financial reports. In this capacity, USBGFS does not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Fund Shares. As compensation for the administration, accounting and management services, the Adviser pays USBGFS a fee based on the Fund’s average daily net assets, subject to a minimum annual fee. USBGFS also is entitled to certain out-of-pocket expenses for the services mentioned above, including pricing expenses.

Custodian. Pursuant to a custody agreement between the Trust and U.S. Bank National Association (“U.S. Bank” or the “Custodian”) (the “Custody Agreement”), U.S. Bank, located at 1555 North River Center Drive, Suite 302, Milwaukee, Wisconsin 53212, serves as the custodian of the Fund’s assets. The Custodian holds and administers the assets in the Fund’s portfolio. Pursuant to the Custody Agreement, U.S. Bank receives an annual fee from the Adviser based on the Trust’s total average daily net assets, subject to a minimum annual fee, and certain settlement charges. The Custodian also is entitled to certain out-of-pocket expenses.

The net proceeds that the Fund receives pursuant to its short sale of options contracts may be retained by the Fund’s prime broker(s) (or by the Fund’s custodian in a special custody account), to the extent necessary to meet margin requirements, until the short position is closed out.

Securities Lending Agent. The Fund may participate in securities lending arrangements whereby the Fund lends certain of its portfolio securities to brokers, dealers and financial institutions (not individuals) to receive additional income and increase the rate of return of the portfolio. U.S. Bank (the “Securities Lending Agent”) serves as securities lending agent to the Fund. The Securities Lending Agent is responsible for the implementation and administration of the Fund’s securities lending program pursuant to an agreement between the Trust, on behalf of the Fund, and the Securities Lending Agent (the “Securities Lending Agreement”). The Securities Lending Agent acts as agent to the Fund to lend available securities with any person on its list of approved borrowers and (i) determines whether a loan shall be made and negotiates and establishes the terms and conditions of the loan with the borrower; (ii) ensures that all substitute interest, dividends, and other distributions paid with respect to loan securities is credited to the Fund’s relevant account on the date such amounts are delivered by the borrower to the Securities Lending Agent; (iii) receives and holds, on the Fund’s behalf, collateral from borrowers to secure obligations of borrowers with respect to any loan of available securities; (iv) marks loaned securities and collateral to their market value each business day based upon the market value of the loaned securities and collateral at the close of business employing the most recently available pricing information and receives and delivers collateral to maintain the value of the collateral at no less than 100% of the market value of the loaned securities; (v) at the termination of a loan, returns the collateral to the borrower upon the return of the loaned securities to the Securities Lending Agent; (vi) invests cash collateral in accordance with the applicable Securities Lending Agreement; and (viii) maintains such records as are reasonably necessary to account for loans that are made and the income derived therefrom and makes available to the Fund a monthly statement describing the loans outstanding, including an accounting of all securities lending transactions.

Distributor. The Trust and Foreside Fund Services, LLC (“Foreside” or the “Distributor”) are parties to a distribution agreement (the “Distribution Agreement”), whereby the Distributor acts as principal underwriter for the Trust and distributes Fund Shares. Fund Shares are continuously offered for sale by the Distributor only in Creation Units. The Distributor will not distribute Fund Shares in amounts less than a Creation Unit and does not maintain a secondary market in Fund Shares. The principal business address of the Distributor is Three Canal Plaza, Suite 100, Portland, Maine 04101.

Under the Distribution Agreement, the Distributor, as agent for the Trust, will receive orders for the purchase and redemption of Creation Units, provided that any subscriptions and orders will not be binding on the Trust until accepted by the Trust. The Distributor is a broker-dealer registered under the Exchange Act and a member of the Financial Industry Regulatory Authority (“FINRA”).

The Distributor also may enter into agreements with securities dealers (“Soliciting Dealers”) who will solicit purchases of Creation Units of Fund Shares. Such Soliciting Dealers also may be Authorized Participants (as discussed in the section entitled “Creation and Redemption of Creation Units”) or DTC participants (as defined below).

The Distribution Agreement will continue for two years from its effective date and is renewable annually thereafter. The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the shareholders of the Fund and (ii) by the vote of a majority of the Independent Trustees who have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement is terminable without penalty by the Trust on 60 days’ written notice when authorized either by majority vote of its outstanding voting Fund Shares or by a vote of a majority of its Board (including a majority of the Independent Trustees), or by the Distributor on 60 days’ written notice, and will automatically terminate in the event of its assignment. The Distribution Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of the Distributor, or reckless

disregard by it of its obligations thereunder, the Distributor shall not be liable for any action or failure to act in accordance with its duties thereunder.

Since the inception of the Fund, there has been no underwriting commissions with respect to the sale of Fund Shares, and the Distributor did not receive compensation on redemptions for the Fund for that period.

Intermediary Compensation. The Adviser, the Sub-Adviser, or their affiliates, out of their own resources and not out of Fund assets (*i.e.*, without additional cost to the Fund or its shareholders), may pay certain broker dealers, banks and other financial intermediaries (“Intermediaries”) for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing and educational training or support. These arrangements are not financed by the Fund and, thus, do not result in increased Fund expenses. They are not reflected in the fees and expenses listed in the fees and expenses sections of the Fund’s Prospectus and they do not change the price paid by investors for the purchase of Fund Shares or the amount received by a shareholder as proceeds from the redemption of Fund Shares.

Such compensation may be paid to Intermediaries that provide services to the Fund, including marketing and education support (such as through conferences, webinars and printed communications). The Adviser and the Sub-Adviser will periodically assess the advisability of continuing to make these payments. Payments to an Intermediary may be significant to the Intermediary, and amounts that Intermediaries pay to your adviser, broker or other investment professional, if any, also may be significant to such adviser, broker or investment professional. Because an Intermediary may make decisions about what investment options it will make available or recommend, and what services to provide in connection with various products, based on payments it receives or is eligible to receive, such payments create conflicts of interest between the Intermediary and its clients. For example, these financial incentives may cause the Intermediary to recommend the Fund rather than other investments. The same conflict of interest exists with respect to your financial adviser, broker or investment professional if he or she receives similar payments from his or her Intermediary firm.

Intermediary information is current only as of the date of this SAI. Please contact your adviser, broker, or other investment professional for more information regarding any payments his or her Intermediary firm may receive. Any payments made by the Adviser, the Sub-Adviser, or their affiliates to an Intermediary may create the incentive for an Intermediary to encourage customers to buy Fund Shares.

Distribution and Service Plan. The Board has adopted a Distribution and Service Plan (the “Plan”) in accordance with the provisions of Rule 12b-1 under the 1940 Act, which regulates circumstances under which an investment company may directly or indirectly bear expenses relating to the distribution of its shares. No payments pursuant to the Plan are expected to be made during the twelve (12) month period from the date of this SAI. Rule 12b-1 fees to be paid by the Fund under the Plan may only be imposed after approval by the Board.

Continuance of the Plan must be approved annually by a majority of the Trustees of the Trust and by a majority of the Trustees who are not interested persons (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the Plan or in any agreements related to the Plan (“Qualified Trustees”). The Plan requires that quarterly written reports of amounts spent under the Plan and the purposes of such expenditures be furnished to and reviewed by the Trustees. The Plan may not be amended to increase materially the amount that may be spent thereunder without approval by a majority of the outstanding shares of the Fund. All material amendments of the Plan will require approval by a majority of the Trustees of the Trust and of the Qualified Trustees.

The Plan provides that the Fund pays the Distributor an annual fee of up to a maximum of 0.25% of the average daily net assets of its Fund Shares. Under the Plan, the Distributor may make payments pursuant to written

agreements to financial institutions and intermediaries such as banks, savings and loan associations and insurance companies including, without limit, investment counselors, broker-dealers and the Distributor's affiliates and subsidiaries (collectively, "Agents") as compensation for services and reimbursement of expenses incurred in connection with distribution assistance. The Plan is characterized as a compensation plan since the distribution fee will be paid to the Distributor without regard to the distribution expenses incurred by the Distributor or the amount of payments made to other financial institutions and intermediaries. The Trust intends to operate the Plan in accordance with its terms and with FINRA's rules concerning sales charges.

Under the Plan, subject to the limitations of applicable law and regulations, each Fund is authorized to compensate the Distributor up to the maximum amount to finance any activity primarily intended to result in the sale of Creation Units of the Fund or for providing or arranging for others to provide shareholder services and for the maintenance of shareholder accounts. Such activities may include, but are not limited to: (i) delivering copies of the Fund's then current reports, prospectuses, notices, and similar materials, to prospective purchasers of Creation Units; (ii) marketing and promotional services, including advertising; (iii) paying the costs of and compensating others, including Authorized Participants with whom the Distributor has entered into written Authorized Participant Agreements, for performing shareholder servicing on behalf of the Fund; (iv) compensating certain Authorized Participants for providing assistance in distributing the Creation Units of the Fund, including the travel and communication expenses and salaries and/or commissions of sales personnel in connection with the distribution of the Creation Units of the Fund; (v) payments to financial institutions and intermediaries such as banks, savings and loan associations, insurance companies and investment counselors, broker-dealers, mutual fund supermarkets and the affiliates and subsidiaries of the Trust's service providers as compensation for services or reimbursement of expenses incurred in connection with distribution assistance; (vi) facilitating communications with beneficial owners of Shares, including the cost of providing (or paying others to provide) services to beneficial owners of Shares, including, but not limited to, assistance in answering inquiries related to Shareholder accounts; and (vii) such other services and obligations as are set forth in the Distribution Agreement.

Aggregations. Fund Shares in less than Creation Units are not distributed by the Distributor. The Distributor will deliver the Prospectus and, upon request, this SAI to Authorized Participants purchasing Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the 1934 Act and a member of the Financial Industry Regulatory Authority ("FINRA").

The Distribution Agreement provides that it may be terminated at any time, without the payment of any penalty, on at least 60 days' written notice by the Trust to the Distributor (i) by vote of a majority of the Independent Trustees; or (ii) by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund. The Distribution Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The Distributor may also enter into agreements with participants that utilize the facilities of the Depository Trust Company (the "DTC Participants"), which have international, operational, capabilities and place orders for Creation Units of the Fund Shares. Participating Parties (as defined in "Procedures for Creation of Creation Units" below) shall be DTC Participants (as defined in "DTC Acts as Securities Depository for Fund Shares" below).

BROKERAGE ALLOCATIONS

The Sub-Adviser is responsible for decisions to buy and sell securities for the Fund and for the placement of the Fund's securities business, the negotiation of the commissions to be paid on brokered transactions, the prices for principal trades in securities, and the allocation of portfolio brokerage and principal business.

The Sub-Adviser owes a fiduciary duty to its clients (including the Fund) to seek to provide best execution on trades effected. In selecting a broker/dealer for each specific transaction, the Sub-Adviser chooses the broker/dealer deemed most capable of providing the services necessary to obtain the most favorable execution. “Best execution” is generally understood to mean the most favorable cost or net proceeds reasonably obtainable under the circumstances. The full range of brokerage services applicable to a particular transaction may be considered when making this judgment, which may include, but is not limited to: liquidity, price, commission, timing, aggregated trades, capable floor brokers or traders, competent block trading coverage, ability to position, capital strength and stability, reliable and accurate communications and settlement processing, use of automation, knowledge of other buyers or sellers, arbitrage skills, administrative ability, underwriting and provision of information on a particular security or market in which the transaction is to occur. The specific criteria will vary depending upon the nature of the transaction, the market in which it is executed, and the extent to which it is possible to select from among multiple broker/dealers. The Sub-Adviser also will use electronic crossing networks (“ECNs”) when appropriate.

Subject to the foregoing policies, brokers or dealers selected to execute the Fund’s portfolio transactions may include the Fund’s Authorized Participants or their affiliates. An Authorized Participant or its affiliates may be selected to execute the Fund’s portfolio transactions in conjunction with an all-cash creation unit order or an order including “cash-in-lieu,” so long as such selection is in keeping with the foregoing policies. The Fund may determine to not charge a variable fee on certain orders when the Sub-Adviser has determined that doing so is in the best interests of Fund shareholders, e.g., for creation orders that facilitate the rebalance of the Fund’s portfolio in a more tax efficient manner than could be achieved without such order, even if the decision to not charge a variable fee could be viewed as benefiting the Authorized Participant or its affiliate selected to execute the Fund’s portfolio transactions in connection with such orders.

The Sub-Adviser may use the Fund’s assets for, or participate in, third-party soft dollar arrangements, in addition to receiving proprietary research from various full-service brokers, the cost of which is bundled with the cost of the broker’s execution services. The Sub-Adviser does not “pay up” for the value of any such proprietary research. Section 28(e) of the Exchange Act permits the Sub-Adviser, under certain circumstances, to cause the Fund to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction in recognition of the value of brokerage and research services provided by the broker or dealer. The Sub-Adviser may receive a variety of research services and information on many topics, which it can use in connection with its management responsibilities with respect to the various accounts over which it exercises investment discretion or otherwise provides investment advice. The research services may include qualifying order management systems, portfolio attribution and monitoring services and computer software and access charges which are directly related to investment research. Accordingly, the Fund may pay a broker commission higher than the lowest available in recognition of the broker’s provision of such services to the Sub-Adviser, but only if the Sub-Adviser determines the total commission (including the soft dollar benefit) is comparable to the best commission rate that could be expected to be received from other brokers. The amount of soft dollar benefits received depends on the amount of brokerage transactions effected with the brokers. A conflict of interest exists because there is an incentive to: (i) cause clients to pay a higher commission than the firm might otherwise be able to negotiate; (ii) cause clients to engage in more securities transactions than would otherwise be optimal; and (iii) only recommend brokers that provide soft dollar benefits.

The Sub-Adviser faces a potential conflict of interest when it uses client trades to obtain brokerage or research services. This conflict exists because the Sub-Adviser can use the brokerage or research services to manage client accounts without paying cash for such services, which reduces the Sub-Adviser’s expenses to the extent that the Sub-Adviser would have purchased such products had they not been provided by brokers. Section 28(e) permits the Sub-Adviser to use brokerage or research services for the benefit of any account it manages. Certain accounts managed by the Sub-Adviser may generate soft dollars used to purchase brokerage or

research services that ultimately benefit other accounts managed by the Sub-Adviser, effectively cross subsidizing the other accounts managed by the Sub-Adviser that benefit directly from the product. The Sub-Adviser may not necessarily use all of the brokerage or research services in connection with managing the Fund whose trades generated the soft dollars used to purchase such products.

If purchases or sales of portfolio securities of the Fund and one or more other investment companies or clients supervised by the Sub-Adviser are considered at or about the same time, transactions in such securities are allocated among the several investment companies and clients in a manner deemed equitable and consistent with its fiduciary obligations to all by the Sub-Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security so far as the Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower brokerage commissions will be beneficial to the Fund. The primary consideration is prompt execution of orders at the most favorable net price.

ADDITIONAL INFORMATION

Book Entry Only System. The following information supplements and should be read in conjunction with the Prospectus.

DTC Acts as Securities Depository for Fund Shares. Fund Shares are represented by securities registered in the name of The Depository Trust Company (“DTC”) or its nominee, Cede & Co., and deposited with, or on behalf of, DTC.

DTC, a limited-purpose trust company, was created to hold securities of its participants (the “DTC Participants”) and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities, certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the New York Stock Exchange (the “NYSE”) and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the “Indirect Participants”).

Beneficial ownership of Fund Shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in Fund Shares (owners of such beneficial interests are referred to herein as “Beneficial Owners”) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase and sale of Fund Shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to a letter agreement between DTC and the Trust, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the Fund Shares held by each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding Fund Shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition,

the Trust shall pay to each such DTC Participants a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Fund distributions shall be made to DTC or its nominee, as the registered holder of all Fund Shares. DTC or its nominee, upon receipt of any such distributions, shall immediately credit DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in Fund Shares as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of Fund Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such Fund Shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may decide to discontinue providing its service with respect to Fund Shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action to find a replacement for DTC to perform its functions at a comparable cost.

Policy Regarding Disclosure of Portfolio Holdings. The Trust has adopted a policy regarding the disclosure of information about the Fund's portfolio holdings. The Board of Trustees must approve all material amendments to this policy. The Fund's portfolio holdings are publicly disseminated each day the Fund is open for business through financial reporting and news services, including publicly accessible Internet websites. In addition, a basket composition file, which includes the security names and share quantities to deliver in exchange for Fund Shares, together with estimates and actual cash components, is publicly disseminated each day the NYSE is open for trading via the National Securities Clearing Corporation ("NSCC"). The basket represents one Creation Unit of the Fund. The Fund's portfolio holdings are also available on the Fund's website at <https://www.roundhillinvestments.com/etf/XBOX>. The Trust, Adviser, Sub-Adviser and the Distributor will not disseminate non-public information concerning the Trust.

Quarterly Portfolio Schedule. The Trust is required to disclose, on a quarterly basis, the complete schedule of the Fund's portfolio holdings with the SEC on Form N-PORT. The Trust discloses the complete schedule of the Fund's portfolio holdings on Form N-CSR after its second and fourth quarters. Form N-PORT and Form N-CSR for the Trust is available on the SEC's website at <https://www.sec.gov>. The Fund's Form N-PORT and Form N-CSR may also be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. and information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330. The Trust's Form N-PORT and Form N-CSR are available without charge, upon request, by calling (855) 561-5728 or by writing to Roundhill ETF Trust, 154 West 14th Street, 2nd Floor, New York, New York 10011.

Codes of Ethics. In order to mitigate the possibility that the Fund will be adversely affected by personal trading, the Trust, the Adviser, the Sub-Adviser and the Distributor have adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes of Ethics contain policies restricting securities trading in personal accounts access persons, Trustees and others who normally come into possession of information on portfolio transactions. Personnel subject to the Codes of Ethics may invest in securities that may be purchased or held by the Fund; however, the Codes of Ethics require that each transaction in such securities be reviewed by the Compliance Department. These Codes of Ethics are on public file with, and are available from, the SEC.

PROXY VOTING POLICIES AND PROCEDURES

The Trust has adopted a proxy voting policy that seeks to ensure that proxies for securities held by the Fund are voted consistently with the best interests of the Fund.

The Board has delegated to the Adviser the proxy voting responsibilities for the Fund and has directed the Adviser to vote proxies consistent with the Fund's best interests. The Adviser has delegated to the Sub-Adviser the day-to-day proxy voting responsibilities of the Fund and has directed the Sub-Adviser to vote proxies consistent with the Fund's best interests. The Sub-Adviser has engaged the services of Institutional Shareholder Services Inc. ("ISS") to make recommendations to the Sub-Adviser on the voting of proxies relating to securities held by the Fund. The Sub-Adviser has adopted the ISS Proxy Voting Guidelines. While these guidelines are not intended to be all-inclusive, they do provide guidance on the Sub-Adviser's general voting policies. The Sub-Adviser's use of the ISS Proxy Voting Guidelines is not intended to constrain the Sub-Adviser's consideration of any proxy proposal, and there may be times when the Sub-Adviser deviates from the ISS Proxy Voting Guidelines. The ISS Proxy Voting Guidelines are subject to change at the discretion of ISS and may be found at issgovernance.com.

Information regarding how the Fund voted proxies (if any) relating to portfolio securities during the most recent 12-month period ended June 30 is available upon request and without charge on the Fund's website at <https://www.roundhillinvestments.com/etf/XBOX>, by calling (855) 561-5728 or by accessing the SEC's website at <https://www.sec.gov>.

CREATION AND REDEMPTION OF CREATION UNITS

General. ETFs, such as the Fund, generally issue and redeem their shares in primary market transactions through a creation and redemption mechanism and do not sell or redeem individual shares. Instead, financial entities, known as "Authorized Participants," have contractual arrangements with an ETF or one of the ETF's service providers to purchase and redeem ETF shares directly with the ETF in large blocks of shares known as "Creation Units." Prior to start of trading on each business day, an ETF publishes through the NSCC the "basket" of securities, cash or other assets that it will accept in exchange for a Creation Unit of the ETF's shares. An Authorized Participant that wishes to effectuate a creation of an ETF's shares deposits with the ETF the "basket" of securities, cash or other assets identified by the ETF that day, and then receives the Creation Unit of the ETF's shares in return for those assets. After purchasing a Creation Unit, the Authorized Participant may continue to hold the ETF's shares or sell them in the secondary market. The redemption process is the reverse of the purchase process: the authorized participant redeems a Creation Unit of ETF shares for a basket of securities, cash or other assets. The combination of the creation and redemption process with secondary market trading in ETF shares and underlying securities provides arbitrage opportunities that are designed to help keep the market price of ETF shares at or close to the NAV per share of the ETF.

Each Authorized Participant is a member or participant of a clearing agency registered with the SEC that has a written agreement with the Fund or one of its service providers that allows the Authorized Participant to place orders for the purchase or redemption of Creation Units (a "Participant Agreement"). Orders to purchase Creation Units must be delivered through an Authorized Participant that has executed a Participant Agreement and must comply with the applicable provisions of such Participant Agreement. Investors wishing to purchase or sell Fund Shares generally do so on an exchange. Institutional investors other than Authorized Participants are responsible for making arrangements for a redemption request to be made through an Authorized Participant.

A “Business Day” is generally any day on which the NYSE, the Exchange and the Trust are open for business. As of the date of this SAI, the NYSE observes the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The Business Day on which an order to purchase or redeem Creation Units is received in proper form is referred to as the “Transmittal Date.”

Basket Composition and Custom Baskets. Rule 6c-11(c)(3) under of the 1940 Act requires an ETF relying on the exemptions offered by Rule 6c-11 to adopt and implement written policies and procedures governing the construction of baskets and the process that the ETF will use for the acceptance of baskets. In general, in connection with the construction and acceptance of baskets, the Adviser may consider various factors, including, but not limited to: (1) whether the securities, assets and other positions comprising a basket are consistent with the ETF’s investment objective(s), policies and disclosure; (2) whether the securities, assets and other positions can legally and readily be acquired, transferred and held by the ETF and/or Authorized Participant(s), as applicable; (3) whether to utilize cash, either in lieu of securities or other instruments or as a cash balancing amount; and (4) in the case of an ETF that tracks an index, whether the securities, assets and other positions aid index tracking.

The Fund may utilize a pro-rata basket or a custom basket in reliance on Rule 6c-11. A “pro-rata basket” is a basket that is a pro rata representation of the ETF’s portfolio holdings, except for minor deviations when it is not operationally feasible to include a particular instrument within the basket, except to the extent that the Fund utilized different baskets in transactions on the same Business Day.

Rule 6c-11 defines “custom baskets” to include two categories of baskets. First, a basket containing a non-representative selection of the ETF’s portfolio holdings would constitute a custom basket. These types of custom baskets include, but are not limited to, baskets that do not reflect: (i) a pro rata representation of the Fund’s portfolio holdings; (ii) a representative sampling of an ETF’s portfolio holdings; or (iii) changes due to a rebalancing or reconstitution of an ETF’s securities market index, if applicable. Second, if different baskets are used in transactions on the same Business Day, each basket after the initial basket would constitute a custom basket. For example, if an ETF exchanges a basket with either the same or another Authorized Participant that reflects a representative sampling that differs from the initial basket, that basket (and any such subsequent baskets) would be a custom basket. Similarly, if an ETF substitutes cash in lieu of a portion of basket assets for a single Authorized Participant, that basket would be a custom basket.

Under a variety of circumstances, an ETF and its shareholders may benefit from the flexibility afforded by custom baskets. In general terms, the use of custom baskets may reduce costs, increase efficiency and improve trading. Because utilizing custom baskets provides a way for an ETF to add, remove and re-weight portfolio securities without transacting in the market, it may help the ETF to avoid transaction costs and adverse tax consequences. Rule 6c-11 provides an ETF with flexibility to use “custom baskets” if the ETF has adopted written policies and procedures that: (1) set forth detailed parameters for the construction and acceptance of custom baskets that are in the best interests of the ETF and its shareholders, including the process for any revisions to, or deviations from, those parameters; and (2) specify the titles or roles of employees of the ETF’s investment adviser who are required to review each custom basket for compliance with those parameters.

The use of baskets that do not correspond to pro rata to an ETF’s portfolio holdings has historically created concern that an Authorized Participant could take advantage of its relationship with an ETF and pressure the ETF to construct a basket that favors an Authorized Participant to the detriment of the ETF’s shareholders. For example, because ETFs rely on Authorized Participants to maintain the secondary market by promoting an effective arbitrage mechanism, an Authorized Participant holding less liquid or less desirable securities

potentially could pressure an ETF into accepting those securities in its basket in exchange for liquid ETF shares (*i.e.*, dumping). An Authorized Participant also could pressure the ETF into including in its basket certain desirable securities in exchange for ETF shares tendered for redemption (*i.e.*, cherry-picking). In either case, the ETF's other investors would be disadvantaged and would be left holding shares of an ETF with a less liquid or less desirable portfolio of securities. The Adviser has adopted policies and procedures designed to mitigate these concerns but there is ultimately no guarantee that such policies and procedures will be effective.

Basket Dissemination. Basket files are published for consumption through the NSCC, a subsidiary of Depository Trust & Clearing Corporation, and can be utilized for pricing, creations, redemptions, rebalancing and custom scenarios. In most instances, pro rata baskets are calculated and supplied by the ETF's custodial bank based on ETF holdings, whereas non-pro-rata, custom and forward-looking pro rata baskets are calculated by the Adviser and disseminated by the ETF's custodial bank through the NSCC process.

Placement of Creation or Redemption Orders. All orders to purchase or redeem Creation Units are to be governed according to the applicable Participant Agreement that each Authorized Participant has executed. In general, all orders to purchase or redeem Creation Units must be received by the transfer agent in the proper form required by the Participant Agreement no later than the closing time of the regular trading session of the NYSE (ordinarily 4:00 p.m. Eastern Standard Time) on each day the NYSE is open for business (the "Closing Time") in order for the purchase or redemption of Creation Units to be effected based on the NAV of shares of the Fund as next determined on such date after receipt of the order in proper form. However, at its discretion, the Fund may require an Authorized Participant to submit orders to purchase or redeem Creation Units be placed earlier in the day (such as instances where an applicable market for a security comprising a creation or redemption basket closes earlier than usual).

Delivery of Redemption Proceeds. Deliveries of securities to Authorized Participants in connection with redemption orders are generally expected to be made within one Business Day. Due to the schedule of holidays in certain countries, however, the delivery of in-kind redemption proceeds for the Fund may take longer than one Business Day after the day on which the redemption request is received in proper form. Section 22(e) of the 1940 Act generally prohibits a registered open-end management investment company from postponing the date of satisfaction of redemption requests for more than seven days after the tender of a security for redemption. This prohibition can cause operational difficulties for ETFs that hold foreign investments and exchange in-kind baskets for Creation Units. For example, local market delivery cycles for transferring foreign investments to redeeming investors, together with local market holiday schedules, can sometimes require a delivery process in excess of seven days. However, Rule 6c-11 grants relief from Section 22(e) to permit an ETF to delay satisfaction of a redemption request for more than seven days if a local market holiday, or series of consecutive holidays, or the extended delivery cycles for transferring foreign investments to redeeming Authorized Participants, or the combination thereof prevents timely delivery of the foreign investment included in the ETF's basket. Under this exemption, an ETF must deliver foreign investments as soon as practicable, but in no event later than 15 days after the tender to the ETF. The exemption therefore will permit a delay only to the extent that additional time for settlement is actually required, when a local market holiday, or series of consecutive holidays, or the extended delivery cycles for transferring foreign investments to redeeming authorized participants prevents timely delivery of the foreign investment included in the ETF's basket. If a foreign investment settles in less than 15 days, Rule 6c-11 requires an ETF to deliver it pursuant to the standard settlement time of the local market where the investment trades. Rule 6c-11 defines "foreign investment" as any security, asset or other position of the ETF issued by a foreign issuer (as defined by Rule 3b-4 under the 1934 Act), and that is traded on a trading market outside of the United States. This definition is not limited to "foreign securities," but also includes other investments that may not be considered securities.

Although these other investments may not be securities, they may present the same challenges for timely settlement as foreign securities if they are transferred in kind.

Creation Transaction Fees. The Fund imposes fees in connection with the purchase of Creation Units. These fees may vary based upon various facts-based circumstances, including, but not limited to, the composition of the securities included in the Creation Unit or the countries in which the transactions are settled. The price for each Creation Unit will equal the daily NAV per Fund Share times the number of Fund Shares in a Creation Unit, plus the fees described above and, if applicable, any operational processing and brokerage costs, transfer fees, stamp taxes and part or all of the spread between the expected bid and offer side of the market related to the securities comprising the creation basket.

Redemption Transaction Fees. The Fund also imposes fees in connection with the redemption of Creation Units. These fees may vary based upon various facts-based circumstances, including, but not limited to, the composition of the securities included in the Creation Unit or the countries in which the transactions are settled. The price received for each Creation Unit will equal the daily NAV per Fund Share times the number of shares in a Creation Unit, minus the fees described above and, if applicable, any operational processing and brokerage costs, transfer fees, stamp taxes and part or all of the spread between the expected bid and offer side of the market related to the securities comprising the redemption basket. Investors who use the services of a broker or other such intermediary in addition to an Authorized Participant to effect a redemption of a Creation Unit may also be assessed an amount to cover the cost of such services. The redemption fee charged by the Fund will comply with Rule 22c-2 of the 1940 Act which limits redemption fees to no more than 2% of the value of the Fund Shares redeemed.

Suspension of Creations. The SEC has stated its position that an ETF generally may suspend the issuance of Creation Units only for a limited time and only due to extraordinary circumstances, such as when the markets on which the ETF's portfolio holdings are traded are closed for a limited period of time. The SEC has also stated that an ETF could not set transaction fees so high as to effectively suspend the issuance of Creation Units. Circumstances in which the Fund may suspend creations include, but are not limited to: (i) the order is not in proper form; (ii) the purchaser or group of related purchasers, upon obtaining the Creation Units of Fund Shares ordered, would own 80% or more of the currently outstanding Fund Shares; (iii) the required consideration is not delivered; (iv) the acceptance of the basket would, in the opinion of the Fund, be unlawful; or (v) there exist circumstances outside the control of the Fund that make it impossible to process purchases of Creation Units for all practical purposes. Examples of such circumstances include: acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Fund, the Adviser, the Distributor, DTC, NSCC, the transfer agent, the custodian, any sub-custodian or any other participant in the purchase process; and similar extraordinary events. The Fund reserves the right to reject a creation order transmitted to it provided that such action does not result in a suspension of sales of creation units in contravention of 6c-11 and the SEC's positions thereunder. The Transfer Agent shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of such prospective creator of the rejection of the order of such person. The Trust, the Fund, the transfer agent, the custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of baskets, nor shall any of them incur any liability for the failure to give any such notification.

Suspension of Redemptions. An ETF may suspend the redemption of Creation Units only in accordance with Section 22(e) of the 1940 Act. Section 22(e) stipulates that no registered investment company shall suspend the right of redemption, or postpone the date of payment or satisfaction upon redemption of any redeemable

security in accordance with its terms for more than seven days after the tender of such security to the company or its agent designated for that purpose for redemption, except (1) for any period (A) during which the NYSE is closed other than customary week-end and holiday closings or (B) during which trading on the NYSE is restricted; (2) for any period during which an emergency exists as a result of which (A) disposal by the investment company of securities owned by it is not reasonably practicable or (B) it is not reasonably practicable for such company fairly to determine the value of its net assets; or (3) for such other periods as the SEC may by order permit for the protection of security holders of the investment company.

Exceptions to Use of Creation Units. Under Rule 6c-11 of the 1940 Act, ETFs are permitted to sell or redeem individual shares on the day of consummation of a reorganization, merger, conversion, or liquidation. In these limited circumstances, an ETF may need to issue or redeem individual shares and may need to transact without utilizing Authorized Participants.

FEDERAL TAX MATTERS

This section summarizes some of the main U.S. federal income tax consequences of owning shares of a Fund. This section is current as of the date of this SAI. Tax laws and interpretations change frequently, and these summaries do not describe all of the tax consequences to all taxpayers. For example, these summaries generally do not describe your situation if you are a corporation, a non-U.S. person, a broker-dealer, or other investor with special circumstances. In addition, this section does not describe your state, local or foreign tax consequences.

This federal income tax summary is based in part on the advice of counsel to a Fund. The Internal Revenue Service could disagree with any conclusions set forth in this section. In addition, our counsel may not have been asked to review, and may not have reached a conclusion with respect to the federal income tax treatment of the assets to be deposited in a Fund. This may not be sufficient for prospective investors to use for the purpose of avoiding penalties under federal tax law.

As with any investment, prospective investors should seek advice based on their individual circumstances from their own tax advisor.

Each Fund intends to qualify annually and to elect to be treated as a regulated investment company under the Internal Revenue Code of 1986, as amended (the "Code").

To qualify for the favorable U.S. federal income tax treatment generally accorded to regulated investment companies, a Fund must, among other things, (i) derive in each taxable year at least 90% of its gross income from dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies or other income derived with respect to its business of investing in such stock, securities or currencies, or net income derived from interests in certain publicly traded partnerships; (ii) diversify its holdings so that, at the end of each quarter of the taxable year, (a) at least 50% of the market value of a Fund's assets is represented by cash and cash items (including receivables), U.S. government securities, the securities of other regulated investment companies and other securities, with such other securities of any one issuer generally limited for the purposes of this calculation to an amount not greater than 5% of the value of a Fund's total assets and not greater than 10% of the outstanding voting securities of such issuer, and (b) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or the securities of other regulated investment companies) of any one issuer, or two or more issuers which a Fund controls which are engaged in the same, similar or related trades or

businesses, or the securities of one or more of certain publicly traded partnerships; and (iii) distribute at least 90% of its investment company taxable income (which includes, among other items, dividends, interest and net short-term capital gains in excess of net long-term capital losses) and at least 90% of its net tax-exempt interest income each taxable year. There are certain exceptions for failure to qualify if the failure is for reasonable cause or is *de minimis*, and certain corrective action is taken and certain tax payments are made by a Fund.

As a regulated investment company, a Fund generally will not be subject to U.S. federal income tax on its investment company taxable income (as that term is defined in the Code, but without regard to the deduction for dividends paid) and net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, that it distributes to shareholders. Each Fund intends to distribute to its shareholders, at least annually, substantially all of its investment company taxable income and net capital gain. If a Fund retains any net capital gain or investment company taxable income, it will generally be subject to federal income tax at regular corporate rates on the amount retained. In addition, amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% excise tax unless, generally, a Fund distributes during each calendar year an amount equal to the sum of (1) at least 98% of its ordinary income (not taking into account any capital gains or losses) for the calendar year, (2) at least 98.2% of its capital gains in excess of its capital losses (adjusted for certain ordinary losses) for the one-year period ending October 31 of the calendar year, and (3) any ordinary income and capital gains for previous years that were not distributed during those years. In order to prevent application of the excise tax, each Fund intends to make its distributions in accordance with the calendar year distribution requirement. A distribution will be treated as paid on December 31 of the current calendar year if it is declared by a Fund in October, November or December with a record date in such a month and paid by a Fund during January of the following calendar year. Such distributions will be taxable to shareholders in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received.

Subject to certain reasonable cause and *de minimis* exceptions, if a Fund fails to qualify as a regulated investment company or fails to satisfy the 90% distribution requirement in any taxable year, such Fund would be taxed as an ordinary corporation on its taxable income (even if such income were distributed to its shareholders) and all distributions out of earnings and profits would be taxed to shareholders as ordinary income.

Distributions. Dividends paid out of a Fund's investment company taxable income are generally taxable to a shareholder as ordinary income to the extent of such Fund's earnings and profits, whether paid in cash or reinvested in additional shares. However, certain ordinary income distributions received from a Fund may be taxed at capital gains tax rates. In particular, ordinary income dividends received by an individual shareholder from a regulated investment company such as a Fund are generally taxed at the same rates that apply to net capital gain, provided that certain holding period requirements are satisfied and provided the dividends are attributable to qualifying dividends received by such Fund itself.

The Code limits the availability of capital gains treatment in certain circumstances. If a transaction is marketed or sold as producing capital gains from a straddle position or the transaction is identified as a conversion transaction by the IRS, the Shareholder will not be eligible for capital gains tax treatment. The structure of the Fund's investments has not been identified by the IRS as a conversion transaction. However, the behavior of brokers and dealers distributing the product could affect the character of the gain on disposition. The IRS could at some future point identify the structure of the Fund's investments as a conversion transaction. In such a situation, Shareholders would not be eligible for capital gains tax treatment.

The Funds will provide notice to its shareholders of the amount of any distributions that may be taken into account as a dividend, which is eligible for the capital gains tax rates. The Funds cannot make any guarantees as to the amount of any distribution which will be regarded as a qualifying dividend.

Income from a Fund may also be subject to a 3.8% “Medicare tax.” This tax generally applies to net investment income if the taxpayer’s adjusted gross income exceeds certain threshold amounts, which are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals.

A corporation that owns Fund Shares generally will not be entitled to the dividends received deduction with respect to many dividends received from such Fund because the dividends received deduction is generally not available for distributions from regulated investment companies. However, certain ordinary income dividends on shares that are attributable to qualifying dividends received by a Fund from certain domestic corporations may be reported by such Fund as being eligible for the dividends received deduction.

Distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, properly reported as capital gain dividends are taxable to a shareholder as long-term capital gains, regardless of how long the shareholder has held Fund Shares. An election may be available to you to defer recognition of the gain attributable to a capital gain dividend if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements. Shareholders receiving distributions in the form of additional Fund Shares, rather than cash, generally will have a tax basis in each such Fund Share equal to the value of a Fund Share on the reinvestment date. A distribution of an amount in excess of a Fund’s current and accumulated earnings and profits will be treated by a shareholder as a return of capital which is applied against and reduces the shareholder’s basis in his or her Fund Shares. To the extent that the amount of any such distribution exceeds the shareholder’s basis in his or her Fund Shares, the excess will be treated by the shareholder as gain from a sale or exchange of such Fund Shares.

Shareholders will be notified annually as to the U.S. federal income tax status of distributions, and shareholders receiving distributions in the form of additional Fund Shares will receive a report as to the value of those Fund Shares.

Code Section 1256 Contracts and Straddles. The Fund is required for federal income tax purposes to mark to market and recognize as income for each taxable year its net unrealized gains and losses on certain futures and options contracts subject to section 1256 of the Code (“Section 1256 Contracts”) as of the end of the year as well as those actually realized during the year. Gain or loss from Section 1256 Contracts on broad-based indexes required to be marked to market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. The Fund may be required to defer the recognition of losses on Section 1256 Contracts to the extent of any unrecognized gains on offsetting positions held by the Fund. These provisions may also require the Fund to mark-to-market certain types of positions in its portfolio (i.e., treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the distribution requirement and for avoiding the excise tax discussed above. Accordingly, to avoid certain income and excise taxes, the Fund may be required to liquidate its investments at a time when the investment adviser might not otherwise have chosen to do so.

Offsetting positions held by the Fund involving certain derivative instruments, such as options, forwards, and futures, as well as its long and short positions in portfolio securities, may be considered to constitute

“straddles” for federal income tax purposes. In general, straddles are subject to certain rules that may affect the amount, character and timing of the Fund’s gains and losses with respect to the straddle positions by requiring, among other things, that: (1) any loss realized on disposition of one position of a straddle may not be recognized to the extent that the Fund has unrealized gains with respect to the other positions in straddle; (2) the Fund’s holding period in straddle positions be suspended while the straddle exists (possibly resulting in a gain being treated as short-term rather than long-term capital gain); (3) the losses recognized with respect to certain straddle positions that are part of a mixed straddle and are non-Section 1256 Contracts be treated as 60% long-term and 40% short-term capital loss; (4) losses recognized with respect to certain straddle positions that would otherwise constitute short-term capital losses be treated as long-term capital losses; and (5) the deduction of interest and carrying charges attributable to certain straddle positions may be deferred. Various elections are available to the Fund, which may mitigate the effects of the straddle rules, particularly with respect to mixed straddles.

In general, the straddle rules described above do not apply to any straddles held by the Fund if all of the offsetting positions consist of Section 1256 Contracts. The straddle rules described above also do not apply if all the offsetting positions making up a straddle consist of one or more “qualified covered call options” and the stock to be purchased under the options and the straddle is not part of a larger straddle. A qualified covered call option is generally any option granted by the Fund to purchase stock it holds (or stock it acquires in connection with granting the option) if, among other things, (1) the option is traded on a national securities exchange that is registered with the SEC or other market the IRS determined has rules adequate to carry out the purposes of the applicable Code provision, (2) the option is granted more than 30 days before it expires, (3) the option is not a “deep-in-the-money option,” (4) such option is not granted by an options dealer in connection with the dealer’s activity of dealing in options, and (5) gain or loss with respect to the option is not ordinary income or loss. In addition, the straddle rules could cause distributions from the Fund that would otherwise constitute “qualified dividend income” or qualify for the dividends received deduction to fail to satisfy the applicable holding period requirements. To the extent the Fund writes options that are not Section 1256 Contracts, the amount of the premium received by the Fund for writing such options is likely to be entirely short-term capital gain to the Fund. In addition, if such an option is closed by the Fund, any gain or loss realized by the Fund as a result of closing the transaction will also generally be short-term capital gain or loss. If such an option is exercised any gain or loss realized by the Fund upon the sale of the underlying security pursuant to such exercise will generally be short-term or long-term capital gain or loss to the Fund depending on the Fund’s holding period for the underlying security.

If the Fund enters into a “constructive sale” of any appreciated financial position in its portfolio, the Fund will be treated as if it had sold and immediately repurchased the property and must recognize gain (but not loss) with respect to that position. A constructive sale of an appreciated financial position occurs when the Fund enters into certain offsetting transactions with respect to the same or substantially identical property, including, but not limited to: (i) a short sale; (ii) an offsetting notional principal contract; (iii) a futures or forward contract; or (iv) other transactions identified in future Treasury Regulations. The character of the gain from constructive sales will depend upon the Fund’s holding period in the appreciated financial position. Losses realized from a sale of a position that was previously the subject of a constructive sale will be recognized when the position is subsequently disposed of. The character of such losses will depend upon the Fund’s holding period in the position beginning with the date the constructive sale was deemed to have occurred and the application of various loss deferral provisions in the Code. Constructive sale treatment does not apply to certain closed transactions, including if such a transaction is closed on or before the 30th day after the close of the Fund’s taxable year and the Fund holds the appreciated financial position unhedged throughout the 60-day period beginning with the day such transaction was closed.

Some of the options, futures contracts, forward contracts, and swap agreements used by the Fund may be considered “section 1256 contracts.” Any gains or losses on section 1256 contracts are generally considered 60% long-term and 40% short-term capital gains or losses (“60/40”) although certain foreign currency gains and losses from such contracts may be treated as ordinary in character. Also, section 1256 contracts held by the fund at the end of each taxable year (and, for purposes of the 4% excise tax, on certain other dates as prescribed under the Code) are “marked to market” with the result that unrealized gains or losses are treated as though they were realized and the resulting gain or loss is treated as ordinary or 60/40 gain or loss.

Generally, the hedging transactions and certain other transactions in options, futures and forward contracts undertaken by the Fund, may result in “straddles” for U.S. federal income tax purposes. In some cases, the straddle rules also could apply in connection with swap agreements. The straddle rules may affect the amount, timing and character of gains (or losses) realized by the Fund. In addition, losses realized by the Fund on positions that are part of a straddle may be deferred under the straddle rules, rather than being taken into account in calculating the Fund’s taxable income for the taxable year in which such losses are realized. Because only a few regulations implementing the straddle rules have been promulgated, the tax consequences of transactions in options, futures, forward contracts, and swap agreements to the Fund are not entirely clear. The transactions may increase the amount of short-term capital gain realized by the Fund which generally would be taxed as ordinary income when distributed to shareholders.

The Fund may make one or more of the elections available under the Code which are applicable to straddles. If the Fund makes any of the elections, the amount, character and timing of the recognition of gains or losses from the affected straddle positions will be determined under rules that vary according to the election(s) made. The rules applicable under certain of the elections operate to accelerate the recognition of gains or losses from the affected straddle positions.

The key features of the straddle rules are as follows:

- The Fund may have to wait (potentially indefinitely) to deduct any losses. If the Fund has a capital gain in one position of a straddle and a capital loss in the other, the Fund may not recognize the loss for U.S. federal income tax purposes until the Fund disposes of both positions. This might occur, for example, if the Fund had a highly appreciated stock position and the Fund purchased protective put options (which give the Fund the right to sell the stock to someone else for a period of time at a predetermined price) to offset the risk. If the stock continued to increase in value and the put options expired worthless, the Fund must defer recognition of the loss on its put options until the Fund sells and recognizes (which may never occur) the gain on the original, appreciated position.
- The Fund’s capital gain holding period may get clipped. The moment the Fund enters into a typical straddle, the capital gains holding period on its offsetting positions is frozen. If the Fund held the original position for one year or less (thus not qualifying for the long-term capital gains rate), not only is the holding period frozen, it starts all over again when the Fund disposes of the offsetting position.
- Losses recognized with respect to certain straddle positions that would otherwise constitute short-term capital losses may be treated as long-term capital losses. This generally has the effect of reducing the tax benefit of such losses.
- The Fund may not be able to deduct any interest expenses or carrying charges. During the offsetting period, any interest or carrying charges associated with the straddle are not currently tax deductible but must be capitalized (added to cost basis).

Because application of the straddle rules may affect the character of gains or losses, defer losses and/or accelerate the recognition of gains or losses from the affected straddle positions, the amount which must be distributed to shareholders, and which generally will be taxed to shareholders either as ordinary income or long-term capital gain, may be increased or decreased substantially as compared to the Fund that did not engage in such hedging transactions.

Rules governing the tax aspects of swap agreements are in a developing stage and are not entirely clear in certain respects. Accordingly, while the Fund intends to account for such transactions in a manner they deem to be appropriate, the IRS might not accept such treatment. If it did not, the status of the Fund as a RIC might be affected. The Trust intends to monitor developments in this area.

Certain requirements that must be met under the Code in order for the Fund to qualify as a RIC, including the Income Requirement and Asset Diversification Test applicable to the Fund's assets may limit the extent to which the Fund will be able to engage in transactions in options, futures contracts, forward contracts, and swap agreements.

In addition, the use of options or other derivatives could adversely affect the character (capital gain vs. ordinary income) of the income recognized by the Fund for U.S. federal income tax purposes, as well as the amount and timing of such recognition, as compared to a direct investment in underlying securities, and could result in the Fund's recognition of income prior to the receipt of any corresponding cash. As a result of the use of options and derivatives, a larger portion of the Fund's distributions may be treated as ordinary income than would have been the case if the Fund did not enter into such options or derivatives. The tax treatment of swap agreements and other derivatives may also be affected by future legislation or U.S. Treasury Regulations and/or guidance issued by the IRS that could affect the character, timing and/or amount of the Fund's taxable income or gains and distributions made by the Fund.

Sale or Exchange of Fund Shares. Upon the sale or other disposition of Fund Shares, which a shareholder holds as a capital asset, such a shareholder may realize a capital gain or loss, which will be long-term or short-term, depending upon the shareholder's holding period for Fund Shares. Generally, a shareholder's gain or loss will be a long-term gain or loss if Fund Shares have been held for more than one year. An election may be available to you to defer recognition of capital gain if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.

Any loss realized on a sale or exchange will be disallowed to the extent that shares disposed of are replaced (including through reinvestment of dividends) within a period of 61 days beginning 30 days before and ending 30 days after disposition of shares or to the extent that the shareholder, during such period, acquires or enters into an option or contract to acquire, substantially identical stock or securities. In such a case, the basis of a Fund Shares acquired will be adjusted to reflect the disallowed loss. Any loss realized by a shareholder on a disposition of Fund Shares held by the shareholder for six months or less will be treated as a long-term capital loss to the extent of any distributions of long-term capital gain received by the shareholder with respect to such Fund Shares.

The Code limits the availability of capital gains treatment in certain circumstances. If a transaction is marketed or sold as producing capital gains from a straddle position or the transaction is identified as a conversion transaction by the IRS, the Shareholder will not be eligible for capital gains tax treatment. The structure of the Fund's investments has not been identified by the IRS as a conversion transaction. However, the behavior

of brokers and dealers distributing the product could affect the character of the gain on disposition. The IRS could at some future point identify the structure of the Fund's investments as a conversion transaction. In such a situation, Shareholders would not be eligible for capital gains tax treatment.

Taxes on Purchase and Redemption of Creation Units. If a shareholder exchanges securities for Creation Units the shareholder will generally recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the shareholder's aggregate basis in the securities surrendered and the Cash Component paid. If a shareholder exchanges Creation Units for securities, then the shareholder will generally recognize a gain or loss equal to the difference between the shareholder's basis in the Creation Units and the aggregate market value of the securities received and the Cash Redemption Amount. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units or Creation Units for securities cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position.

Nature of Fund Investments. Certain of the Funds' investment practices are subject to special and complex federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions; (ii) convert lower taxed long-term capital gain into higher taxed short-term capital gain or ordinary income; (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited); (iv) cause a Fund to recognize income or gain without a corresponding receipt of cash; (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur; and (vi) adversely alter the characterization of certain complex financial transactions.

Investments in Certain Non-U.S. Corporations. If a Fund holds an equity interest in any "passive foreign investment companies" ("PFICs"), which are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, such Fund could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its shareholders. A Fund will not be able to pass through to its shareholders any credit or deduction for such taxes. A Fund may be able to make an election that could ameliorate these adverse tax consequences. In this case, a Fund would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, a Fund might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject to the distribution requirement and would be taken into account for purposes of the 4% excise tax (described above). Dividends paid by PFICs are not treated as qualified dividend income.

Backup Withholding. A Fund may be required to withhold U.S. federal income tax from all taxable distributions and sale proceeds payable to shareholders who fail to provide such Fund with their correct taxpayer identification number or fail to make required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. Corporate shareholders and certain other shareholders specified in the Code generally are exempt from such backup withholding. This withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability.

Non-U.S. Shareholders. U.S. taxation of a shareholder who, as to the United States, is a nonresident alien individual, a non-U.S. trust or estate, a non-U.S. corporation or non-U.S. partnership ("*non-U.S.*

shareholder”) depends on whether the income of a Fund is “effectively connected” with a U.S. trade or business carried on by the shareholder.

In addition to the rules described in this section concerning the potential imposition of withholding on distributions to non-U.S. persons, distributions to non-U.S. persons that are “financial institutions” may be subject to a withholding tax of 30% unless an agreement is in place between the financial institution and the U.S. Treasury to collect and disclose information about accounts, equity investments, or debt interests in the financial institution held by one or more U.S. persons or the institution is resident in a jurisdiction that has entered into such an agreement with the U.S. Treasury. For these purposes, a “financial institution” means any entity that (i) accepts deposits in the ordinary course of a banking or similar business; (ii) holds financial assets for the account of others as a substantial portion of its business; or (iii) is engaged (or holds itself out as being engaged) primarily in the business of investing, reinvesting or trading in securities, partnership interests, commodities or any interest (including a futures contract or option) in such securities, partnership interests or commodities. This withholding tax is also currently scheduled to apply to the gross proceeds from the disposition of securities that produce U.S. source interest or dividends. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

Distributions to non-financial non-U.S. entities (other than publicly traded non-U.S. entities, entities owned by residents of U.S. possessions, non-U.S. governments, international organizations, or non-U.S. central banks), will also be subject to a withholding tax of 30% if the entity does not certify that the entity does not have any substantial U.S. owners or provide the name, address and TIN of each substantial U.S. owner. This withholding tax is also currently scheduled to apply to the gross proceeds from the disposition of securities that produce U.S. source interest or dividends. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

Income Not Effectively Connected. If the income from a Fund is not “effectively connected” with a U.S. trade or business carried on by the non-U.S. shareholder, distributions of investment company taxable income will generally be subject to a U.S. tax of 30% (or lower treaty rate), which tax is generally withheld from such distributions.

Distributions of capital gain dividends and any amounts retained by a Fund which are properly reported by such Fund as undistributed capital gains will not be subject to U.S. tax at the rate of 30% (or lower treaty rate) unless the non-U.S. shareholder is a nonresident alien individual and is physically present in the United States for more than 182 days during the taxable year and meets certain other requirements. However, this 30% tax on capital gains of nonresident alien individuals who are physically present in the United States for more than the 182 day period only applies in exceptional cases because any individual present in the United States for more than 182 days during the taxable year is generally treated as a resident for U.S. income tax purposes; in that case, he or she would be subject to U.S. income tax on his or her worldwide income at the graduated rates applicable to U.S. citizens, rather than the 30% U.S. tax. In the case of a non-U.S. shareholder who is a nonresident alien individual, a Fund may be required to withhold U.S. income tax from distributions of net capital gain unless the non-U.S. shareholder certifies his or her non-U.S. status under penalties of perjury or otherwise establishes an exemption. If a non-U.S. shareholder is a nonresident alien individual, any gain such shareholder realizes upon the sale or exchange of such shareholder’s Fund Shares in the United States will ordinarily be exempt from U.S. tax unless the gain is U.S. source income and such shareholder is physically present in the United States for more than 182 days during the taxable year and meets certain other requirements.

Distributions from a Fund that are properly reported by such Fund as an interest-related dividend attributable to certain interest income received by such Fund or as a short-term capital gain dividend attributable to certain net short-term capital gain income received by such Fund may not be subject to U.S. federal income taxes, including withholding taxes when received by certain non-U.S. shareholders, provided that such Fund makes certain elections and certain other conditions are met. For tax years after December 31, 2022, amounts paid to or recognized by a non-U.S. affiliate that are excluded from tax under the portfolio interest, capital gain dividends, short-term capital gains or tax-exempt interest dividend exceptions or applicable treaties, may be taken into consideration in determining whether a corporation is an “applicable corporation” subject to a 15% minimum tax on adjusted financial statement income.

In addition, capital gain distributions attributable to gains from U.S. real property interests (including certain U.S. real property holding corporations) will generally be subject to United States withholding tax and will give rise to an obligation on the part of the non-U.S. shareholder to file a United States tax return.

Income Effectively Connected. If the income from a Fund is “effectively connected” with a U.S. trade or business carried on by a non-U.S. shareholder, then distributions of investment company taxable income and capital gain dividends, any amounts retained by such Fund which are properly reported by such Fund as undistributed capital gains and any gains realized upon the sale or exchange of such Fund’s Shares will be subject to U.S. income tax at the graduated rates applicable to U.S. citizens, residents and domestic corporations. Non-U.S. corporate shareholders may also be subject to the branch profits tax imposed by the Code. The tax consequences to a non-U.S. shareholder entitled to claim the benefits of an applicable tax treaty may differ from those described herein. Non-U.S. shareholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of an investment in a Fund.

Capital Loss Carryforward. Net capital gains of a Fund that are available for distribution to shareholders will be computed by taking into account any applicable capital loss carryforward.

Other Taxation. Fund shareholders may be subject to state, local and foreign taxes on their Fund distributions. Shareholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of an investment in a Fund.

DETERMINATION OF NET ASSET VALUE

The NAV per Fund Share is computed by dividing the value of the net assets of the Fund (i.e., the value of its total assets less total liabilities) by the total number of Fund Shares outstanding, rounded to the nearest cent. Expenses and fees, including the management fees, are accrued daily and taken into account for purposes of determining NAV. The NAV of the Fund is calculated by USBGFS and determined at the scheduled close of the regular trading session on the NYSE (ordinarily 4:00 p.m., Eastern time) on each day that the NYSE is open, provided that fixed-income assets may be valued as of the announced closing time for trading in fixed-income instruments on any day that the Securities Industry and Financial Markets Association (“SIFMA”) announces an early closing time.

In calculating the Fund’s NAV per Fund Share, the Fund’s investments are generally valued using market prices to the extent such market quotations are readily available. If market quotations are not readily available, including if market quotations are deemed to be unreliable by the Adviser, the Fund will fair value such investments and use the fair value to calculate such Fund’s NAV. Pursuant to Rule 2a-5 under the 1940 Act, the Board has designated the Adviser to perform the fair value determinations for the Fund’s portfolio holdings

subject to the Board's oversight. The Adviser's fair value determinations will be carried out in compliance with Rule 2a-5 and based on fair value methodologies established and applied by the Adviser and periodically tested to ensure such methodologies are appropriate and accurate with respect to the Fund's portfolio holdings. The Adviser's fair value methodologies may involve obtaining inputs and prices from third-party pricing services.

DIVIDENDS AND DISTRIBUTIONS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Dividends, Distributions and Taxes."

General Policies. Dividends from net investment income of the Fund, if any, are declared and paid at least annually. Distributions of net realized securities gains, if any, generally are declared and paid once a year, but the Trust may make distributions on a more frequent basis. The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a regulated investment company or to avoid imposition of income or excise taxes on undistributed income.

Dividends and other distributions of Fund Shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Fund.

Dividend Reinvestment Service. No reinvestment service is provided by the Trust. Broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund for reinvestment of their dividend distributions. Beneficial Owners should contact their brokers in order to determine the availability and costs of the service and the details of participation therein. Brokers may require Beneficial Owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

MISCELLANEOUS INFORMATION

Legal Counsel. Chapman and Cutler LLP, 320 South Canal Street, Chicago, Illinois 60606, is legal counsel to the Trust.

Independent Registered Public Accounting Firm. Cohen & Company, Ltd., located at 1835 Market Street, Suite 310, Philadelphia, Pennsylvania 19103, serves as the Fund's independent registered public accounting firm. Cohen & Company, Ltd. audits the Fund's financial statements and performs other related audit services.

PERFORMANCE INFORMATION

To obtain the Fund's most current performance information, please call (855) 561-5728 or visit the Fund's website at <https://www.roundhillinvestments.com/etf/XBOX>. From time to time, the Fund's performance information, such as yield or total return, may be quoted in advertisements or in communications to present or prospective shareholders. Performance quotations represent the Fund's past performance and should not be

considered as representative of future results. The Fund will calculate its performance in accordance with the requirements of the rules and regulations under the 1940 Act, as they may be revised from time to time.
